Please Circle DNA Sample Providers Relationship to Missing

*The most useful family reference DNA samples are from close blood relatives such as the missing persons biological mother, father, children, brother, or sisters. Close maternal relatives of the missing person allows for the analysis of both nuclear and mitochondrial DNA. Our lab can be contact for questions at 651-793-2900.

Shaded boxes represent a potential maternal relative. If the missing person is female any of her children are also considered a maternal relative.

*Primary Donor for nuclear DNA
