

2015-MN-004: Highly Pathogenic Avian Influenza

Situation Report

Subject: 2015-MN-004: HPAI Monitoring Situation Report #8

Reporting Period: 04/22/2015 13:00 - 04/23/2015 12:59

Operations Section Chief

Agency Summary

To date, a total of 15 counties have been identified with HPAI positive premises.

HSEM Staff have been actively collaborating with partner agencies and county emergency management staff.

- Governor Dayton has issued Governor's Executive Order 15-09, "Declaring a State of Peacetime Emergency in the State of Minnesota," effective April 23, 2015. The SEOC will increase its internal and state agency staffing in accordance with the order.
- A State Agency Briefing will be held at 0900 hours on Friday, April 24 in the SEOC. Invitations to agency partners will be forthcoming.
- The SEOC continues to be at Activation Level III - Partial Activation in response to the HPAI outbreak.
- Operations, Planning and Logistics attended the SEOC Chiefs Briefing in the SEOC.
- The Operations and Preparedness Branch Directors attended the Minnesota Department of Agriculture (MDA) situational briefing.
- Operations, Planning, and Logistics Staff monitored the MDA Briefing conference call.
- Operations, Planning and Logistics Staff held the daily state agency conference call.
- Logistics Section staff are providing resource assistance to county Emergency Managers.
- DisasterLAN continues to be updated frequently with the latest news, fact sheets and other information for situational awareness.

MN Department of Employment and Economic Development

Agency Summary

- DEED Emergency Management continues to monitor the situation through DLAN and through participation in coordination conference calls.

MN Department of Health

Agency Summary

Monitoring Data as of April 23, 2015:

- In total from March 4-April 22, 140 people involved in care of flocks have been interviewed and evaluated.

MDH follow-up and monitoring for 10 days has been completed for 62 people associated with flocks. We have tested 10 people who reported one or more of the above-listed symptoms, but have not identified any infections with this virus. To date, no H5N2 infections have been reported in persons in the United States.
