

## EXAMPLE:

## REJECTION DECAL (Out-of-service)

The rejection, or out of service sticker, is placed on the windshield in the vicinity of the annual inspection decal. This indicates the bus failed the inspection and cannot be operated until repaired.

The bus may be operated after repair is certified by the owner or his designee by signing the copy of the School Bus Inspection Deficiency Report (PS 18073) and carrying that report in the first aid kit.

The sticker shall be removed only upon authorization from a CVI II or trooper who has determined that the defects that caused the rejection have been corrected.
