

Did you know?

Notifying Gopher State One Call is free.

If you hire a professional contractor they are responsible for notifying Gopher State One Call.

Some underground utilities can be located mere inches below the surface.

Striking utilities can cause property damage, injuries or death.

CALL BEFORE YOU DIG

- It's the law to notify Gopher State One Call at least two business days before you dig.
- There are two ways to report excavation activity: Call 811 or go to gopherstateonecall.org.
- Notifying Gopher State One Call ensures the utilities buried in your yard are marked so you don't damage them.
- You should mark the digging area with white stakes or spray paint so locators don't mark your entire yard.
