## **“Moms” Booster Seat Radio Spot**

---

### **“Moms”**

MOM: Hey moms, when we drive, our most precious cargo should be as safe as possible.

I'm talking about our children —and securing them in booster seats between the ages of 4 and 8 until they are 4 feet 9 inches or age 8.

Boosters are safe, smart and now the law in Minnesota.

Boosters lift a child up so a seat belt fits properly.

Belts should never rub against necks, be wrapped around the back or tucked under arms.
