- The Office of Traffic Safety is pleased that Jim Cleary and Rebecca Pirius of the Minnesota House of Representative Research Department permitted the reproduction here of their 2008 article, “An Overview of Minnesota’s DWI Laws” (see Appendix D). Minnesota’s DWI law is notably complex, but this article provides a concise overview.

Note:

The Minnesota Department of Public Safety is working to create an accessible electronic version of this document that meets the State of Minnesota Accessibility Standard and Minnesota State Statutes Section 16E.03. The most up-to-date version of this document will be posted on the Minnesota Department of Public Safety Website:

August 2012

Drunk driving accounts for one-third of Minnesota's traffic deaths each year, which underscores how this issue remains a number-one public safety concern.

In the last five years, 651 people have been killed in drunk driving crashes. These fatal crashes involved drivers or pedestrians who were at or above the 0.08 legal limit.

The impact of these preventable fatalities eclipses the fact that our state has made progress to curb the problem in recent years. A decade ago there were 185 drunk driving deaths; in 2011, there were 111. Meanwhile, alcohol-related crashes and DWI arrests are trending downward. This progress signals motorists are making safer, smarter decisions, and enhanced, targeted enforcement and education programs are working.

This report, *Minnesota Impaired Driving Facts 2011*, presents the impaired driving facts and provides a wide-range view of the problem. This publication also explains Minnesota's impaired driving laws. Here are key facts from 2011:

- 368 people died in traffic crashes in Minnesota and 111 (30 percent) were crashes involving drunk drivers.
- 2,375 people suffered injuries in alcohol-related crashes.
- 29,257 motorists were arrested for DWIs (an average of 81 DWIs per day).
- 76 percent of motorists arrested for DWI resulted in a criminal conviction for driving while impaired; this percentage will increase as outstanding cases are settled in courts.
- 12,103 (41 percent) of these violators had at least one prior DWI.
- 1,903 (7 percent) of DWIs were issued to drivers less than 21 years of age.
- One out of every seven licensed drivers in Minnesota has at least one DWI.

The Office of Traffic Safety, our law enforcement partners and our *Toward Zero Deaths* traffic safety advocates are committed to stopping impaired driving. We need all Minnesotans to take responsibility and make safe, smart decisions to avoid the dangers and the consequences of drunk driving.

Sincerely,

Donna Berger
Director, Office of Traffic Safety

<u>AN OVERVIEW OF MINNESOTA'S DWI LAWS</u>	60

I. IMPAIRED DRIVING INCIDENTS ON RECORD

Summary

There were 29,257 impaired driving incidents that occurred in Minnesota in 2011 and then entered onto people's driving records. That's a 2% decrease from the previous year. Eighty-eight percent of the incidents involved taking a test for alcohol or drugs;* 12% involved a test refusal.† A few incidents (13--less than 1%) involved both a test failure and a test refusal (for example, an alcohol test refusal and a drug test failure). A small number of the total incidents included a conviction for "criminal vehicular operation" resulting in a fatality (12 such incidents) or injury (132 such incidents).

"Not-a-Drop" and "Disqual" violations

Two types of incidents are reported in Table 1.01 but not otherwise considered as "impaired driving incidents" in this report. First, there are "not-a-drop" violations. (The Not-A-Drop law was passed in 1993 and applies to persons under age 21, making it illegal for them to drive while having any amount of alcohol in their blood.) The number of such violations rose steadily from 1,386, in 1994, to close to 3,700 in 1999, but then dropped rather sharply in the past decade to 1,097 in 2011.

The second violation type has the jargon-like name "disqual." This refers to an incident where a commercial vehicle driver is tested and found to have an alcohol concentration of .04% or higher. Such a driver will then be disqualified from operating a commercial vehicle. These incidents are somewhat rare. There were only 15 in 2011. (Note that if the commercial driver has an AC over the *per se* illegal level, then the incident will be counted as a conviction or an implied consent violation; it will still trigger the disqualification, but it will not be counted here as a "disqual.")

When do incidents occur?

There is high consistency year after year with respect to when drinking and driving occurs in terms of days of the week. Year 2011 was similar to past years: Mondays through Thursdays had comparatively few incidents. Then Fridays accounted for 16%, Sundays for 23%, and Saturdays for 27% of all incidents.

Alcohol concentration levels remain steady

In 1997 the Legislature adopted special sanction provisions effective in January 1998 for high-AC offenders (0.20% or higher), and alcohol test results began to be available starting in 1998. There may be some decline among high-scoring violators; there were 5,551 in the over 0.20% category in 2002, then 4,768 in 2011. This represents a 14% decline. (Note that the Legislature adopted special sanction provisions effective in July 2011 for high-AC offenders (0.16% or higher).

Average alcohol level among first-time violators was 0.155% in 2002 and 0.148% in 2011. Second-or-subsequent violators averaged 0.170% in 2002 and 0.165% in 2011. These lower alcohol concentration levels are to be expected in some degree due to the lower .08 *per se* level that went into effect 08/01/2005.

Who are the violators?

Driver license files provide only limited data on who the drinking drivers are. However, there is a strong relationship between age and impaired driving. Twenty-to-thirty-four year-olds accounted for 55% of the impaired driving incidents in 2011. In addition, there were 1,903 impaired driving incidents among underage drivers. This is especially disturbing since it is illegal to drink in Minnesota if you are less than 21 years of age.

In addition, there is an exceedingly strong relationship between gender and impaired driving. Most succinctly put, the problem is concentrated in the young adult male population. In 2011, males committed 73% of the impaired incidents (for which gender of the violator was reported).

Surprisingly, even though the seven-county twin-cities metro area is growing in population relative to the non-metro area, a decreasing proportion of DWI incidents are occurring there: In 1992, 53% of all incidents occurred in the 7 county metro area, but in 2011, just 51% of all incidents occurred there.

Recidivism: 40% of violators were recidivists

Section IV will look at recidivism more closely. In general, though, in recent years, about 60 percent of all violators had no prior alcohol incidents on record, and 40 percent did. There is an interesting violation pattern among the recidivists: About half of those who incur a second incident go on to incur a third. About half those who incur a third go on to incur a fourth, and so on.

* The tests are usually for alcohol, but they might be for controlled substances. In 2011, there were 867 incidents (involving either an implied consent violation or a criminal conviction, or both) for driving while impaired by controlled substances.

† Test refusals used to be higher. For example in 1992, 21% of all incidents involved a test refusal.

Column Notes:

- (1) Column 1 counts the total number of impaired driving incidents in Minnesota. Columns 2 through 9 are subsets of column 1.
- (2) Almost all incidents include the civil-law “implied consent” violation either of (i) taking and “failing” the test for alcohol or controlled substances (“drugs”), or (ii) refusing to take the test.
- (3) In 2011, 76% of all incidents were known to involve a criminal conviction for driving while impaired by alcohol or drugs (as of June 01, 2012—the date on which statistics for this report were compiled). This percentage is understated. As judicial outcomes are decided well into the future, the criminal conviction percentage will increase to approximately 85%.
- (4-6) An incident may involve taking of a test, and a test refusal. For example, a person may take a test for alcohol, and refuse a test for drugs.
- (7-8) Criminal vehicular operation (CVO) offenses are divided into CVO resulting in a fatality (column 7) or CVO resulting in any type of bodily injury, all collapsed into (column 8).
- (9) Incidents counted in (9) involved an implied consent violation or a criminal conviction, or both, for driving while impaired by a controlled substance (“drugs”). See additional detail in Table 1.02.
- (10) The “not-a-drop” law, making it illegal for persons under age 21 to drive while having any amount of alcohol whatsoever (as opposed to being over the *per-se* illegal level) took effect June 1, 1993.
- (11) Commercial vehicle drivers found to have an alcohol concentration of .04% or higher, but less than the *per se* illegal level, are disqualified from operating a commercial vehicle.

Note:

A given incident, at the point of arrest, could involve only a test for alcohol, or only a test for drugs, or tests for both, or a refusal of both, or a test for one and a refusal of a test for the other. Incidents were classified into the first arrest scenario (involving test for alcohol) only if (1) there was no test for drugs, and (2) there was no refusal. An incident was classified into the second arrest scenario (involving a test for drugs) if there was any test for drugs, even if there may also have been a test for alcohol. No incident that involved any refusal was classified into the first or second groups. All incidents where the arrest involved any refusal were classified into the third scenario (involving a test refusal) above.

In United States law, the term “conviction” refers to a finding of guilt—either because a person pled guilty or was found guilty—for an offense under criminal law. Minnesota first defined driving while intoxicated to be a crime in 1911. Minnesota first passed the civil Implied Consent law in 1961:

By driving, a person implies consent to a test for alcohol, if required to take a test by an officer who has probable cause to suspect impairment. As amended over the years, the Implied Consent law now instructs the Commissioner of Public Safety to withdraw a person’s driver license if the person refuses to take a test for alcohol, or for controlled substances (“drugs”), or if the person takes the test and ‘fails’ it by testing over a defined *per-se* illegal level (in the case of alcohol, set, since August 1, 2005, at .08%). Additionally, in 1992, Minnesota defined test refusal to be a crime, effective January 1, 1993.

The license withdrawal under the civil law occurs independently of the outcome of proceedings under the criminal law. Thus, an impaired driving incident for which there is an arrest may then lead to a revocation under the civil law (an “implied consent”—“IC” in the table above), or a criminal conviction (“CC” in the above table), or, most commonly, both (“IC+CC”).

TABLE 1.03

IMPAIRED DRIVING INCIDENTS BY MONTH, 1992 – 2011

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
1992	2,460	2,454	2,722	2,515	2,881	2,623	2,748	2,885	2,558	2,608	2,283	2,104	30,841

Notes:

(1) The row heading "First" designates alcohol test results on first-time violators; the heading "Repeat" designates results on persons with one or more prior incidents on their record. The column "Not Tested" means no alcohol test result was reported; tests for specific controlled substances may have been reported but are not identified on computerized driver records.

(2) The *per se* illegal AC was 0.10% (one-tenth of one percent, or one part per thousand, of a person's blood, when expressed as a BAC) from 1971 to July 31, 2005, and is

0.08% since August 1, 2005. Among those arrested, concentrations below the *per se* level are rare, even though, due to human variation, a person may be quite impaired at lower levels. An unintended consequence of adopting the *per se* law in 1971 was that the alcohol concentration, rather than actual impairment, became the standard for making an impaired driving arrest. However, drivers may still be arrested and may still incur impaired driving violations while having lower alcohol concentrations. Also, drug-impaired driving often occurs together with alcohol-impaired driving.

TABLE 1.06

**IMPAIRED DRIVING INCIDENTS BY
GENDER OF VIOLATOR, 1992 – 2011**

Year	Male	Female	Not Stated	Total
1992	24,787	5,581	473	30,841
1993	24,165	5,466	457	30,088
1994	23,225	5,303	1,220	29,748
1995	23,383	5,452	1,568	30,402
1996	23,938	5,449	1,536	30,923
1997	24,073	5,816	1,491	31,380
1998	24,597	6,135	1,690	32,422
1999	26,069	6,520	1,985	34,575
2000	26,027	6,823	2,184	35,034
2001	24,771	6,562	2,200	33,532
2002	24,200	6,626	2,338	33,163
2003	23,327	6,589	2,351	32,266
2004	24,455	7,242	2,505	34,202
2005	26,174	8,103	2,725	37,002
2006	29,161	9,410	3,380	41,951
2007	26,680	8,907	3,082	38,669
2008	24,426	8,524	2,845	35,794
2009	22,244	7,955	2,558	32,756
2010	20,056	7,446	2,416	29,918
2011	19,851	7,280	2,126	29,257

Note: The table at left makes it appear that the number of violators for whom gender is not stated is increasing over time. This is not so. If a person arrested for DWI does not have a Minnesota driving record, one is created showing name and date of birth, but not gender. As years pass, many of these persons subsequently obtain a Minnesota driver license, causing gender to be entered on record. The table at left merely takes advantage of current information to categorize the gender of persons arrested in prior years.

Table 1.11 counts incidents that occurred in Minnesota, based on the total number of incidents the person has on his or her driving record. That is, incidents counted in row 1 were incurred by first-time violators who had zero prior impaired driving incidents on their driving record. For example, Mr. Smith incurs his first-ever incident anywhere, and that incident occurs in Minneapolis in January, 2001. Mr. Smith incurs a second incident in Iowa in July, 2002, and a

third incident, again in Minneapolis, in August, 2004. In this case, Mr. Smith's first incident contributes a count of one to row 1 of the 2001 column. The second incident is not counted in the above table because it did not occur in Minnesota. The third incident contributes a count of one to the third row of the 2004 column because it did occur in Minnesota and because it is the third on Mr. Smith's driving record.

II. IMPAIRED DRIVING CRIMINAL CONVICTION RATES

This section provides statistics on the number of impaired driving incidents by county and judicial district, and the number and percentage of that total for which there is a criminal conviction on some type of impaired driving charge. On an infrequent basis, however, an offense will lead to an impaired driving conviction, but not be counted as such. This could be due either:

- (1) To the circumstance that the conviction occurred after the date on which the data used to compile these statistics were extracted from the state driver license files, or
- (2) To reporting errors.

Timing of conviction

Conviction rates for 2011 were calculated using data available on June 01, 2012 – five full months after the end of the 2011 calendar year. However, the criminal charge sometimes takes longer than that to resolve. This is especially true for more serious charges, such as the higher-level impaired driving offenses. A driver is more likely to challenge such charges in the courts.

Reporting errors

The second reason a conviction might not be counted is that errors occur. A court clerk may fail to accurately record a plea, or a verdict, or a judge's sentence. The Court Administrator's office may not accurately transmit notice of the conviction to the Department of Public Safety. The Department of Public Safety may not accurately record the conviction on the person's driving record. The procedures that underlie the charging, prosecuting, adjudicating, and recording of impaired driving offenses are complex enough that there are opportunities for mistakes. The objective in reporting the statistics here is to assist in identifying possible failures so they can be corrected.

Examples of why a conviction may not be counted

Hypothetically, if a county had 100 impaired driving incidents committed by first-time violators in 2011 and driver license records show that only 85 resulted in an impaired driving conviction, then the conviction rate is 85 out of 100, or 85.0%. There was no impaired driving conviction posted on the driver's record for 15 of the incidents. Suppose that John Smith committed one of those 15 incidents. This means that Smith was stopped; he took and failed, or refused to take, tests for alcohol or controlled

substances, thus incurring an implied consent violation and triggering the impaired driving incident to be posted on his record. Here are some reasons why a criminal conviction might *not* be reported for Mr. Smith:

(1) There was a plea bargain: The prosecutor agreed to allow Smith to plead guilty to careless driving.

(2) Smith was convicted on some type of impaired driving charge, but not until after the June 01, 2012 date on which the statistics compiled here are based.

(3) Smith was convicted, but the judge stayed adjudication of the conviction on condition that Smith conforms to various requirements. Since adjudication was stayed, the conviction is held in abeyance and not transmitted to the Department of Public Safety.

(4) In addition to impaired driving, Smith had a felony charge for transporting methamphetamines. He pled guilty to the felony offense and was sentenced to five years in prison and a fine of \$5,000. The county attorney waived the charge on the impaired driving offense.

(5) The judge stayed imposition of the sentence on condition that Smith conforms to various requirements. The court clerk accidentally recorded the stay of imposition as a stay of adjudication, causing the Court Administrator's office to not forward the conviction notice to the Department of Public Safety.

(6) Smith was convicted of some impaired driving offense, but the Court Administrator's office did not report the conviction to the Department of Public Safety, or reported it in an incorrect manner that caused the report to be rejected.[‡]

(7) Smith was convicted and the Department of Public Safety was properly notified of the conviction but mistakenly entered the impaired driving conviction as a conviction for some other type of violation (e.g., speeding).

[‡] The Department of Public Safety returns incomplete reports to the Court Administrator's Office with a request for a corrected report.

How the Conviction Rate is Calculated

The conviction rate is expressed merely as a percent: out of 100 incidents, what number resulted in a conviction for *some* type of impaired driving offense. Two issues require comment: (1) how prior violations are counted, and (2) the circumstance that the conviction rate is not a measure of how much plea-bargaining or sentence bargaining may be occurring.

1. Counting prior violations

Table 2.01 has separate columns for first- through fourth-or-subsequent-time violators. The violators who committed the incidents were put into these categories based on a *lifetime* look back period,[§] not a *ten-year* look back period. The current statute MS 169A defines impaired driving offense levels in terms of certain aggravating factors. Prior incidents *in the last ten years* are one type of aggravating factor. (Each prior incident augments the count of aggravating factors by one.) If a ten-year look back period had been used, there would have been slightly more incidents counted into the “first-time violators” column and slightly fewer counted into the second-through fourth-or-subsequent-time columns.

[§] The term “lifetime” look back period may be misleading. Currently, an impaired driving incident remains on the driver license forever, and there has always been a rule (for several decades, at any rate) that a second impaired driving incident causes all incidents to be kept on record forever. However, at different points in the past, there were different rules followed—that a single incident not followed by a second was eligible to be purged from the driver record after seven, or ten, or fifteen, years had passed. However, purging of incidents from records was not performed systematically; so even when those rules were in effect, eligibility to be purged did not mean that an incident was purged. For practical purposes, as an example, if a person is now in their forties and had a single impaired driving incident when they were in their teens or twenties, then that incident may or may not have been purged from their driving record.

^{**} The other two aggravating factors are (1) presence of children in the vehicle, and (2) having an alcohol concentration of .16 or higher (as of July 1, 2011).

2. Not measuring plea bargaining

People are concerned with how much plea-bargaining takes place in impaired driving cases. The conviction rates are not good measures of plea-bargaining, however. Bargaining take two forms. Plea bargaining occurs when a prosecutor initially charges for one offense (e.g., first-degree impaired driving) and then accepts a plea of guilty to a lesser offense (e.g., second-, third-, or fourth-degree impaired driving, or reckless driving, or speeding, etc.). Second, there is sentence bargaining: The prosecutor agrees to accept a sentence less than the maximum for the offense on which the violator is convicted. For example, Smith pleads guilty to gross misdemeanor impaired driving but gets a misdemeanor impaired driving sentence.

Judicial Districts in Minnesota

The conviction rates reported here do not measure the extent of plea-bargaining or sentence bargaining. They only quantify, for all the incidents that occurred, the percentage that resulted in *some* kind of impaired driving conviction. It cannot be known, from the driver license data, (1) if the conviction was for a lesser offense than the one initially charged, or (2) what the sentence was.

Conviction rates vary by County and District

The state is divided into ten judicial districts. Ramsey County is District 2, and Hennepin County is District 4. The other eight districts encompass from four to 17 counties that are geographically close together. Conviction rates usually vary by district and by county. Across districts in 2011, the range of conviction rates was from 68.2% (District 4: Hennepin County) to 85.0% (for District 8, comprised of 13 counties in West Central Minnesota).

Some counties had conviction rates at 90% or higher: Red Lake (93%), Lyon (92%), Wilkin (92%), Hubbard (91%), and Polk (90%).

Some counties had conviction rates that were lower than 70%: Lake of the Woods (60%), Lincoln (64%), Washington (64%), Nicollet (66%), Hennepin (68%), and Dakota (68%).

Out of 29,257 impaired driving incidents in 2011, the overall conviction rate for Minnesota was 75.8%. As mentioned previously, the conviction rate for each year will increase to approximately 85% as judicial outcomes are settled. Another reason for the delay in judicial outcomes is likely because of current litigation. Defendants arrested for impaired driving have brought suit regarding the computer source code which measures alcohol content via breath tests. As many as 4,000 outcomes from 2009 and onward may be pending.

NOTE:

- (1) There is no restriction on the “look back” period in counting prior violations. For example, a second-time violator could have incurred his or her first violation 12 years, or 1 week, prior to the second violation.
- (2) Caution regarding interpreting table: The data compiled here reflect convictions received as of June 01, 2012.

However, new information is constantly being added to driver license records. In addition, as offense level increases, violators face stiffer penalties and have more incentive to fight conviction through legal proceedings. The conviction rates will therefore increase as time passes; each year the overall conviction rate for all offenses will rise to approximately 85%.

III. PERSONS WITH IMPAIRED DRIVING INCIDENTS ON RECORD

This section reports statistics on Minnesota's total population, the population of licensed drivers, and the population of persons who have impaired driving incidents on their driving record.

Currently, an impaired driving incident is kept on record permanently

Current practice is that an impaired driving incident stays on a person's driver license record permanently. However, there were different rules in the past. At points over the last 25 years, a single incident might have been eligible to be purged from a driving record after seven, ten, or fifteen years. However, purging of incidents from records was not performed systematically; so, even when the different rules were in effect, eligibility to be purged did not mean that an incident was purged. Apart from rules for a single incident, there has long been (for several decades) in effect a rule that if a person incurred a second impaired driving incident, then all impaired driving incidents were kept on record permanently. The practical effect of having the different rules over time is that the number of persons currently shown to have two or more incidents on record will be close to the true number of people who ever accumulated two or more incidents, while the number shown to have only one incident will understate the true number of people who ever incurred a single incident. For example, there are probably many middle-aged or older persons who incurred a single incident when they were young, but never incurred a second one, and, at some point (probably in the early 1990s, or before); the single incident was purged from their driving record.

10.7% of Minnesota residents have a DWI

In all, 570,191 Minnesota residents have one or more impaired driving incidents on their driving record. That is 10.7% of all people living in Minnesota (using the U.S. Census Bureau's 2011 population estimate for Minnesota).

1 in 7 licensed drivers have an incident on record

Now consider that many residents in Minnesota are too young to drive. Out of the 2011 total of licensed drivers in Minnesota, 1 in 7 have one or more incidents on record; 1 in 17 have two or more, and 1 in 37 have three or more.

In addition to Minnesota residents, there are 102,695 non-residents who have incurred one or more incidents in Minnesota.

Counties vary

As noted, 10.7% of the state's population has an incident on their driving record. There is variation by county. The five counties with the highest percentages are: Mahnomon (21.4%), Mille Lacs (16.2%), Clearwater (15.0%), Cass (14.6%), and Becker (14.3%) – these counties are north and west of the Twin Cities.

The five counties with the lowest percentages are Stevens (7.4%), Rock (7.4%), Lincoln (8.1%), Carver (8.6%), and Washington (8.8%) -- mostly south of the Twin Cities. Reasons for the variation might include: prevalence of chemical dependency problems in the population, strictness of enforcement of DWI laws, whether the county is in a vacation, or recreational, area of the state.

Most offenders have one incident

There is a perception that so much of the drinking and driving problem is concentrated in a fairly small subset of the population whose members are chemically dependent and who drink and drive over and over again. There is evidence to support such a perception. Forty-two percent of the 570,191 persons in the state with incidents on record have two or more incidents. Some people have an amazing number of incidents: 1,265 have ten or more. The record is now 25 incidents. Still, it is possible the perception distracts attention from the reality that most violators do not have prior incidents on record. Fifty-eight percent have only one incident. (As noted earlier, this understates the true number since a single incident may have been purged from a person's driving record).

Note:

Gender is not stated for many persons. When a person applies for a driver license, gender is entered on the record. If a person is arrested for impaired driving and does not have a driver license, then a record is created but gender is not entered on that record.

Note:

(1) The above table classifies violators based on current residence, as known at the time data are compiled from the drivers' license files. Residence may be inaccurate since persons with impaired driving incidents may avoid notifying the Department of Public Safety of address changes.

(2) Incidents counted may have occurred in Minnesota or elsewhere. If a person moves to Minnesota from another state and applies for a driver license here, he or she will be included, and incidents incurred in Minnesota or elsewhere will be included.

(3) Gender is not stated for many persons. When a person applies for a driver license, gender is entered on the record. If a person is arrested for impaired driving and does not have a driver license, then a record is created but gender is not entered on that record.

IV. IMPAIRED DRIVING RECIDIVISM IN MINNESOTA

Is it the case that a fairly small number of chronic, chemically-dependent persons account for almost all the impaired driving violations that occur in a year? Or, are most of the offenders “first-timers?” How many first-time violators are there? How many repeat violators (recidivists) are there? Among the repeat offenders, how many have one, two, three, and so on, prior violations?

It is possible to look at all the incidents, and at all persons who incurred incidents, in a year, based on the number of incidents *prior* to the one being counted in the year. This will produce measures of recidivism based on violators’ past histories. (Tables 4.02 and 4.03 do this.)

Age and recidivism

Recidivism measures based on past history could be misleading, though. Older violators have had much more time and opportunity to recidivate than young violators: 24% of violators in their twenties have prior incidents, compared to 34% of those in their thirties, 44% of those in their forties, 51% of those in their fifties, and 52% of those 60 and older.

In the recent past, there has been a mini-population explosion among persons in their twenties -- the “echo” of the baby-boom generation. This dramatic increase in the young-violator population might make it appear that first-time violators are increasing, and that recidivism is decreasing, when in fact those young first-time violators might, as the years go by, recidivate just as much as older violators have. It is possible to select cohorts of violators from past years and follow them forward in time, thus providing prospective measures of recidivism. (Tables 4.04 through 4.07 do this.)

RECIDIVISM BASED ON PAST HISTORY

To measure recidivism in terms of prior incidents, three issues require definition: (1) what is the definition of “impaired driving incident?” (2) what is the “look-back period” over which prior incidents are counted? And (3), what is being counted -- incidents, or the persons who commit them?

(1) Defining an incident: An incident may be defined more broadly as *either* an implied consent violation *or* an impaired driving criminal conviction, or, more narrowly, requiring that the incident include the impaired driving criminal conviction. The *ratios* of first-time to repeat violations are similar, but there were 7,082 fewer incidents in 2011 when the narrower definition is used.

(2) Length of look-back period: Minnesota Statute defines impaired driving offenses as misdemeanors, gross misdemeanors, or felonies

based in part on how many prior incidents the person had over specified lengths of time. But a person may have had incidents before the specified time periods.

Table 4.02 tabulates incidents, and Table 4.03 tabulates persons, based on prior incidents under both a lifetime look-back period and a nine-to-ten-year look-back period.^{††} The *total* numbers (of incidents or of persons) are the same, but there are higher numbers and percentages of *first-time* incidents (in Table 4.02) and of *first-time* violators (in Table 4.03) when only a nine-to-ten-year look-back period is used, compared to when a lifetime look-back period is used.

(3) Counting incidents versus counting persons: A person may incur multiple incidents in a year. Table 4.02 counts *incidents* based on the total number on the person’s record. Thus, if John Smith incurred a third incident on January 1, and a fourth on February 1, the third is counted in row 3 and the fourth is counted in row 4 of Table 4.02. Table 4.03 counts *persons* who incurred incidents. In this table, Smith is counted once, based on his last incident, in row 4.

Recidivists commit less than half of the violations

If a person arrested for a second or subsequent offense is defined as a recidivist, then, depending on other definitions, recidivists committed somewhere between 31 and 41 percent of the 2011 incidents. Under the broader definition and using a lifetime look-back period, recidivists committed 41% of the incidents (and first-time violators 59%). Under the narrower definition, and using the nine-to-ten-year look-back period, recidivists committed 31% of the incidents (and first-time violators 69%).

Taking a step back, one could say that first-time violators accounted for well over half the impaired driving violations in 2011. Since repeat DWI offenders get so much attention, due to sometimes accumulating so many arrests and convictions, it is worthwhile to remember that, currently, the novice is the more typical offender.

RECIDIVISM MEASURED PROSPECTIVELY AMONG VIOLATOR COHORTS

^{††}As an example of using a “nine-to-ten-year look-back period,” the records of all violators who incurred incidents in 2011 were examined for the period from 1-1-2002 through 12-31-2011. Thus, the look-back period could be as short as 9 years and 1 day for a violator who incurred an incident on 12-31-2002, or as long as 10 years for a violator who incurred an incident on 1-1-2002.

Among 13,994 first-time violators from 1996, 40% incurred a second violation within 180 months (15 years) of their first. The recidivism rate is greatest in the first months after the first incident, and then gradually trails off as years go by: 7% incurred a second incident within the first 12 months of their first, another 6% recidivated in the second 12 months, another 5% in the third 12 months, and another 4% in the fourth 12 months. Cumulatively, 23% recidivated by four years out, 32% by eight years out, 38% by 12 years out, and 40% by 15 years out.^{§§}

Among the cohort of 5,769 violators who incurred a second incident in 1996, a higher percentage recidivate, but the pattern of higher recidivism in the early months, then declining recidivism, is similar to that of the first-timer cohort: 9% incurred a third incident within the first 12 months of their second, another 8% recidivated in the second 12 months, another 8% in the third 12 months, and another 6% in the fourth 12 months. Cumulatively, 29% recidivated by four years out, 41% by eight years out, 47% by 12 years out, and 50% by 15 years out.

Recidivism since 1996

First-, second-, and third-time violators from each year 1996-2007 (making up 36 violator cohorts, three for each of twelve years) were followed forward in time for up to 48 months. For first-time violators recidivism decreased slightly. For 1996 first-time violators 22.5% recidivated within 48 months, compared to 18.2% of year 2007 first-time violators. However, there is evidence that recidivism is declining at a higher rate when considering multiple offenders. Twenty-nine percent of 1996 second-time violators recidivated within 48 months, compared to 21% of year-2007 second-time violators - an eight percentage-point drop. Finally, 27% of 1996 third-time violators recidivated within 48 months, compared to just 19% of year-2007 third-time violators – a significant eight percentage-point drop.

Another perspective: violators are just older now

Work done separately and not reported here suggests that the decline in recidivism does not show itself when violators are examined within age groups. Specifically, for example, 35-year-old violators in recent years are just as likely to get a first, second, third, or fourth impaired driving incident as were 35

year-old violators in the early 1990s. The same observation was found to be true for almost all age-years examined—specifically, for persons at each year of age from 21 through 49.

There were two exceptions to that rule. One exception was that, for each year over the last decade, 22, 23, and 24 year-old violators were somewhat more likely to incur first-time violations. The other exception was that, over the last decade, violators in their later twenties appeared slightly less likely to incur third- and fourth-time incidents than was true of violators in their late twenties during the early 1990s.

In general however, the decline in recidivism appears to disappear when age of violators is controlled for.

This other perspective may suggest that efforts to change drinking and driving behavior have been unsuccessful. Two considerations weigh against this conclusion. First, the work that looked at first-, second-, third-, and fourth-time incidents within same-age cohorts focused on violators as proportions of the total population of violators. It is possible that the total number of episodes of drinking and driving in the state of Minnesota (not just those that end in arrest) *have* gone down significantly, but have decreased almost perfectly equally across all ages and offense levels, causing the appearance of no change in recidivism. Second, it is very difficult to believe that, if no efforts to control drinking and driving were made, incidence would not greatly increase. Reducing drinking and driving is a tremendous challenge, calling for as much energy and creativity as can be brought to the problem.

^{§§} DWI violators may change residences frequently. To increase validity of the prospective measures of recidivism, violators were only accepted into cohorts if they were shown to currently reside in Minnesota.

V. ALCOHOL-RELATED CRASH STATISTICS BY COUNTY

A century of impaired driving and traffic deaths

The automobile was invented around 1900, and the dangers of drinking and driving were recognized immediately. The earliest available statistics report 23 traffic deaths in Minnesota in 1910. The state enacted its first DWI law in 1911. As the baby-boom generation entered driving age in the 1960's, more than half (60%) of all traffic deaths were due to drinking and driving. It began decreasing around 1980, in response to increased societal consciousness and to legislation and programs modeled in some part on the Scandinavian countries' tough approach to drinking and driving.

Defining a traffic crash

Minnesota started systematic record-keeping on traffic crashes in the 1930s. A 1939 law defined the reporting threshold: Any crash involving a fatality, an injury, or property damage of \$50 or more, had to be reported. The dollar minimum threshold was raised to \$100 in 1965, then to \$300 on August 1, 1977, \$500 on August 1, 1981, and \$1,000 on August 1, 1994.

Though it is not the normal case, the property damage involved doesn't have to be to vehicles. It might be to a road sign, or shrubbery, for example. It is unknown how many crashes occur that should be reported, but are not. Less severe crashes are easier to conceal and it is not difficult to speculate that there may be as many crashes that should be, but are not, reported, as there are that do get reported.

Defining "alcohol-related"

This section uses a broader definition of "alcohol-related" than might at first be assumed. In particular, an "alcohol-related" crash might *not* have involved a drunk driver. The definition used here is that if a pedestrian, bicyclist, or motor vehicle driver had *any* alcohol,*** then the crash is classified as "alcohol-

related," and anyone who died or got injured in the crash is counted as an alcohol-related death or injury. So, if a pedestrian with only a .01% alcohol concentration (AC) stumbles in front of a sober driver and is struck and killed, the crash is defined to be alcohol-related, and the death is an alcohol-related traffic fatality. Such cases are not the rule, however. Most crashes classified as alcohol-related do involve motor vehicles drivers who consumed a considerable amount of alcohol.

Defining "impaired-related"

This section also uses a strict definition of "alcohol-related" when a fatal crash occurs. In particular, a fatal crash and any resulting fatalities will be classified as "impaired-related" when at least one driver or pedestrian in that particular crash tested positive for alcohol at the .08 legal limit or above. Note that Tables 5.02 and 5.03 in this Section use both of these definitions.

'Known' alcohol-involved crashes

State law requires a medical examiner to measure the alcohol content of any driver or pedestrian aged 16 or older who dies within four hours of a crash. Among the states, Minnesota has one of the highest (sometimes the highest) percentage of killed drivers tested. We make great effort to obtain these test results, as well as the results on all surviving drivers, bicyclists and pedestrians in fatal crashes that may have been tested.

Clearly, if a state tests a smaller percentage of drivers, then fewer crashes will be classified as "alcohol-related" or "impaired-related. Thus, states that have good impaired-driving programs, and good testing programs, may appear to have higher alcohol-related death rates than states with lesser programs.

*** To be precise, the following procedure is used: If an alcohol test result is positive for any driver, bicyclist, or pedestrian, the crash is classified as alcohol-related. If a test was not performed, but the reporting officer perceived the "apparent physical condition" of the driver, pedestrian, or bicyclist to be "had been drinking" or "under the influence," then the crash is classified as alcohol-related. In the (rare) event that there is a conflict between the officer's reported perception and the chemical test result; the test result is used in place of the officer's perception.

Non-fatal crashes likely understated for alcohol

The numbers cited in this section for alcohol-related non-fatal crashes are known to understate the true parameters for such crashes. For non-fatal crashes, the officer's judgment, noted on the crash report, is the only basis available to classify the crash as alcohol-related or not.

To test the effect of using only officer perception compared to also having test result data available, fatal crashes in 2011 were classified as alcohol-related or not using both techniques. Using officer perception alone, 78 (21%) of the 368 fatalities were classified as alcohol-related. Using officer perception and test results together, 136 (37%) of the 368 fatalities were classified as alcohol-related.^{†††}

Crash numbers generally

The number of crashes that get reported has been declining in recent years, from over 100,000 in year 2000, to about 72,000 in 2011. About one-half of one percent (about 330) of all reported crashes are fatal, causing death to one or more persons and perhaps injury to other persons as well. Then about a third of all crashes involve injuries to people, but no deaths. Then the great majority of crashes -- about two-thirds -- only involve property damage; no one is killed or injured.

Impairment likely as crash severity increases

Even allowing that alcohol involvement is underestimated in the less severe crashes, there is still a strong relationship between crash severity and impairment. In 2011, 4% of property damage crashes, 8% of injury crashes, and 37% of fatal crashes were classified as alcohol-related.

Cost of alcohol-related traffic crashes

Cost figures reported are based on the estimated costs of traffic crashes, deaths, and injuries, as provided annually by the National Safety Council.

There are two approaches to estimating traffic crash costs. The one used here attempts to quantify the direct economic costs. As explained by the National Safety Council, it has five components: "(1) wage and productivity losses, including wages, fringe benefits, household production, (2) medical expenses, (3) administrative expenses, including insurance,

police, and legal costs, (4) motor vehicle damage, and (5) employer costs for crashes involving workers."^{†††}

Using this approach, for example, the National Safety Council estimates costs for the 2011 calendar year as follows:

Death	\$1,410,000
Incapacitating (A) Injury	\$69,200
Non-incapacitating (B) Injury.....	\$22,300
Possible (C) Injury.....	\$12,600
Property Damage Crash.....	\$8,900

The other approach estimates the "comprehensive costs" and attempts to include "a measure of the value of lost quality of life associated with the deaths and injuries, that is, what society is willing to pay to prevent them."^{§§§} Using that approach yields the following cost estimates for the 2011 year:

Death	\$4,360,000
Incapacitating (A) Injury	\$220,300
Non-incapacitating (B) Injury.....	\$56,200
Possible (C) Injury.....	\$26,700
No Injury	\$2,400

Table 5.04 uses the more narrowly defined estimates based just on economic costs. The cost estimates are quite conservative in other respects as well: First, they make no effort to include the costs of crashes that were reported, but not classified as alcohol-related, even though they were. As noted, the number of crashes classified as alcohol-related is certain to understate the true number. Second, the cost estimates make no attempt to include costs from alcohol-related crashes that were never reported at all.

Using "impaired-related" fatalities, the estimated cost of all alcohol involved crashes in 2011 was \$226,861,800.

^{†††} It would not necessarily be correct, however, to conclude that if alcohol test data were also available for non-fatal crashes, then there would be a comparable increase in the proportion of those crashes that are classified as alcohol-related. That could be so; however, reporting and record-keeping are handled differently for fatal and non-fatal crashes. Thus, the statistical patterns may not be similar for fatal and non-fatal crashes.

Minnesota Total				\$ 226,861,800	

Note: Costs are calculated using estimates, provided annually by the National Safety Council, that do not attempt to include “comprehensive costs” of traffic crashes, deaths and injuries, but just direct costs due to medical expense, property damage, and lost produc-

tivity. Other procedures (e.g.; those used by the US Department of Transportation) that do attempt to include comprehensive costs result in total cost estimates about three times as great as those calculated here.

APPENDIX A

Terms Describing Impaired Driving Incident in Minnesota

This report is produced by the Office of Traffic Safety in the Minnesota Department of Public Safety and provides information about impaired driving in the state. The report is meant to aid in describing the parameters of a significant public health threat, but there are problems in reporting the statistics in a clear way. The problems are mainly due to (1) the lack of a clear terminology and (2) the complexity of Minnesota's impaired driving laws.

There is no clearly defined set of terms to describe impaired driving situations. For traffic crashes, Minnesota follows the American National Standards Institute's "Manual on Classification of Motor Vehicle Traffic Accidents," which has been in use (with new editions periodically) nationwide since the 1940s. There is no similar manual for describing impaired driving incidents.

In this report, the term "impaired driving" is used, but even it has problems. For example, if an officer arrests a person for DWI, and the person refuses to take the alcohol test and then plea-bargains the DWI charge to speeding, the incident is still classified as an impaired driving incident since the test refusal violates the Implied Consent Law which is part of the Impaired Driving Code. But the fact of impairment was not actually established. Definitions of terms are shown below, but these definitions are subject to change in the future.

The second obstacle to clear statistical reporting is the complexity of the law. Minnesota enacted its first DWI law in 1911. There are now more than 35,000 DWI arrests annually -- more than for any other criminal offense in the state. For nearly a century, defense attorneys have found loopholes in the law, while the state has sought to tighten the law.

Apart from the DWI laws themselves, there is an important distinction between criminal offenses and civil law violations. Minnesota Statute (MS) 609.02 defines "crime" as "conduct ... for which the actor may be sentenced to imprisonment..." Therefore, a

crime is committed if a person performs a behavior the law defines as criminal, regardless of whether the person is detected, arrested, prosecuted, found guilty, and sentenced to jail or prison.

In contrast, a civil law violation cannot lead to incarceration.^{****} In impaired driving cases under civil law, when a person refuses or fails an alcohol or drug test, the police officer acts as agent of the Commissioner of Public Safety and issues the driver license revocation form. In some cases the Commissioner may impose additional requirements (e.g. treatment), but the Commissioner cannot impose a jail sentence.

This report uses the following conventions: The terms "crime," "offense," and "criminal offense" are used to describe violations of the criminal impaired driving law. The term "violation" is used to describe a breaking of the civil Implied Consent law. "Violation" and "violation" are general terms though. Thus, a crime is a type of violation, and "violation" refers to a person who breaks a criminal law, a civil law, or both.

Minnesota's first DWI law consisted of a single sentence: "Whoever operates a motor vehicle while in an intoxicated condition shall be guilty of a misdemeanor." The current law takes an entire chapter (MS 169A) and defines it to be a crime for a person to "drive, operate, or be in physical control of any motor vehicle within this state..." when the person is under the influence of alcohol, or under the influence of any of a large number of impairing substances, or when the person has an alcohol concentration of 0.08 or more, or when a person

^{****} Also, a person is not considered to have violated a civil law unless it is so determined through a legal process. Thus, a person can sue another for breach of contract, but the other person's behavior is not a violation unless a court determines that it is. The defendant might then be ordered to make restitution, or pay a fine, but cannot be incarcerated.

refuses to take a test under the Implied Consent Law, and so on.

In 1961, Minnesota passed the civil “Implied Consent” law, defining the principle that by driving on a public roadway, a person by implication gives consent to a test for alcohol upon being stopped by an officer having probable cause to suspect impairment. If the driver refused the test, the State would revoke the person’s driving license for six months.

In 1971, the criminal law was amended to stipulate that having an alcohol concentration of 0.10 or higher was no longer just *prima facie* evidence of intoxication, but was in itself (“*per se*”) a crime.^{††††} Thus, Minnesota’s “criminal *per se*” law dates from 1971.

In 1976, Minnesota became the first state to pass an “administrative *per se*” law, authorizing the Commissioner of Public Safety to revoke a person’s driver’s license upon refusal to take the alcohol test or upon taking and “failing” the test.^{††††} The Commissioner imposes this revocation independently of whatever happens in the criminal DWI case, and without the need to prove guilt to the higher level required in the criminal case. Almost all states now have an “administrative *per se*” law.^{§§§§}

Thus Minnesota pioneered the “two-track system.” The Commissioner of Public Safety revokes the driver’s license if a person fails or refuses the test, even if the person is found not guilty of the criminal DWI charge. Likewise a court can find a person guilty of impaired driving even in the absence of a test failure or refusal.

The complexity of the law often causes more than one violation to be recorded on a person’s driving record for a single incident. To make up an extreme example: Suppose a 20-year-old commercial vehicle driver is driving while impaired by a combination of alcohol and marijuana and has a crash killing another driver and injuring two passengers. Upon arrest, the driver refuses a urine test for drugs, but takes and fails

the breath test, with an alcohol concentration of 0.15%.

The driver potentially could incur the following violations. The alcohol test failure is a criminal offense under MS 169A.20(1). It is also a civil law violation under MS 169A.52(4). The drug test refusal is a criminal offense under MS 169A.20(2) and is also a civil law violation under MS 169A.52(3). Since the driver was under age 21, he violated MS 169A.33(2). As a commercial vehicle driver with an AC over .04, he violated MS 169A.20(6) and also MS 169A.52(2). Since the incident caused a death and two injuries, a felony conviction for criminal vehicular operation resulting in a fatality is possible under MS 609.21(1), and two separate felony convictions for criminal vehicular operation resulting in an injury are possible under MS 609.21(2). Each of the above violations could cause an entry to the person’s driver record (although there can be only one offense under MS169A.20).

Since a single incident may lead to multiple violations, a circumstance such as the following could occur: In a year, there are 35,000 impaired driving arrests. Five-hundred of those never get recorded as an impaired driving incident. Among the remaining 34,500 arrests that do lead to an impaired driving incident on record, there are 34,000 civil Implied Consent law violations, and 27,000 impaired-driving criminal convictions, for a total of 61,000 violations. In addition, Minnesotans may incur violations in other states and those will be placed on their Minnesota driving record. Also, non-Minnesotans incur violations in Minnesota, and the Department of Public Safety creates a record in the state’s driver license file to keep track of those violations.

For all these reasons, it is useful to distinguish between incidents, violations, and violators. The number of incidents on record in a year should show a close correspondence to the number of arrests in a year. Violations will be more numerous, and the types of violations incurred will help to characterize an incident. For example, did the incident involve test failure or test refusal? Was an injury or fatality involved? It is also useful to think about incidents separately from the persons who committed them. A person may go through an irresponsible phase in his or her life and incur several incidents in a year or two, and then reform. Thus, in a year, there may be 34,500 incidents on record, but if 1,500 persons were arrested twice, and 500 were arrested three times in the year, then 32,000 persons accounted for the 34,500 incidents. In this report, Section I deals with impaired

^{††††} In 2004 the Legislature reduced the *per se* level to 0.08%, effective August 1, 2005.

^{††††} The District of Columbia had a similar ordinance, but Minnesota was the first state to pass “administrative *per se*.”

^{§§§§} Though Minnesota was the first state to have such a law, the District of Columbia had a similar ordinance prior to the passing of the Minnesota law.

driving incidents -- when and where they occurred, what types of violations were involved, and so on. Section II shows the criminal conviction rates for the incidents. Section III deals with persons -- How many have DWI incidents on record? How many prior incidents do they have? and so on. Section IV focuses

more specifically on recidivism. Section V reports statistics on crashes and their costs. For each county, it shows total crashes, fatalities, and injuries, and the number and percentage of them of them that were classified as alcohol-related.

APPENDIX B

DEFINITIONS

Disqualification

A “disqualification” is the action taken by the Commissioner of Public Safety on a person’s commercial vehicle driver’s license upon being notified that the person was operating a commercial vehicle while having an alcohol concentration of .04% or higher. The Commissioner “disqualifies” the driver from operating commercial vehicles. This action is mandated under the Implied Consent Law, MS 169A.52. (MS 169A.20 makes it a crime for a person to operate a commercial vehicle while having an alcohol concentration over 0.04% and provides for separate actions upon conviction.)

A disqualification is not counted as an impaired driving incident unless the driver also had a regular implied consent law violation or impaired driving conviction.

DWI

“DWI” appears to be the historic and classic term to designate impaired driving. It may not have a precise definition. It could stand for driving while intoxicated, driving while under the influence, driving while impaired.

In Minnesota, a usage evolved to some extent that the term “DWI” refers to an actual conviction under the criminal statute while the term “implied consent” or “administrative license revocation” refers to the revocation by the Commissioner of Public Safety under the Implied Consent law.

Thus, if John Doe got convicted in court under MS169A.20, it would be said that he “got a DWI.” If he did not get convicted but did get revoked under the Implied Consent law (169A.50 to 169A.53), then it would *not* be said that he got a DWI, but that he “got an implied consent.”

Throughout this report, the term “impaired driving incident [on record]” (or merely “incident”) is used as a collective term to designate a “DWI,” or an

implied consent revocation, or a single incident that resulted in both an administrative license revocation and a criminal conviction for an offense specified in the impaired driving code.

DWI Law

In 2000, the Legislature completely recodified Minnesota’s DWI law. The changes mostly took effect January 1, 2001. The law up through year 2000 had become gradually more complex. The main criminal law was contained in MS 169.121. Other DWI criminal laws were 169.1211 and 169.129. These laws contained many references to other laws which had to be consulted to fully understand the main law. The Implied Consent law was MS 169.123, and there were many references between it and the criminal DWI laws.

The 2000 recodification combined all of these into a new chapter MS 169A, and specified that “this chapter may be cited as the Minnesota Impaired Driving Code.”

Thus, the term “DWI law” increasingly appears obsolete and the preferred term increasingly appears to be “impaired driving law.”

Implied Consent Law

Minnesota Statutes, sections 169A.50 to 169A.53, make up the “Implied Consent” law -- the civil law stating that by implication a person who drives in Minnesota gives his or her consent to a chemical test for purposes of gathering evidence as to whether or not an offense under Minnesota’s impaired driving law has occurred. The chemical test can be of a person’s blood, breath, or urine, and the test can be for alcohol or for any other substance specified in MS 169A.20. Under the Implied Consent Law, the Commissioner of Public Safety imposes a one-year license revocation for test refusal, or a ninety-day to one-year revocation (depending on the prior record) for a test failure.

Incident

An episode of impaired driving, regardless of whether it is detected and prosecuted.

Incident on Record

An incident on record is an episode of impaired driving or an episode in which the Implied Consent law was violated and the following also occurred: The incident was detected and a stop was made and the driver was found in court to have violated the criminal impaired driving law 169A.20, or it was established that the driver violated the Implied Consent law either (1) by taking a chemical test and “failing” it, or (2) by refusing to take the required test. Furthermore, the fact of this criminal offense and/or civil law violation has been recorded on the person’s Minnesota driving record.

Minnesota Resident

As used in this report, a person for whom records maintained by the Department of Public Safety show to be a current resident of Minnesota. Note that the Department of Public Safety may not be promptly notified that a person died, or (as may especially be true of multiple DWI offenders) that a person moved from the state.

Non-Minnesota Resident

As used in this report, a person for whom records maintained by the Department of Public Safety show as not being a current resident of Minnesota. The person may have been a resident and moved away, or may never have been a resident.

Not-a-drop

Minnesota Statute 169A.33 is sometimes referred to as the “not a drop” law. It provides that a person under the age of 21 who drives with any amount of alcohol shall have his or her license revoked by the Commissioner of Public Safety. In this report, a not-a-drop violation is not counted as an impaired driving incident unless the driver also had a regular implied consent law violation or impaired driving conviction.

Offender

A person who has committed a petty misdemeanor, misdemeanor, gross misdemeanor, or felony, regardless of whether it is detected and prosecuted.

Offense

A petty misdemeanor, misdemeanor, gross misdemeanor, or felony. (All DWI offenses are misdemeanor or higher.) An offense may or may not be detected and prosecuted.

Violation

A breaking of one of Minnesota’s criminal or civil laws.

Violator

A person who breaks a criminal or civil law in Minnesota.

APPENDIX C

CHRONOLOGY OF MINNESOTA IMPAIRED DRIVING LEGISLATION SINCE 1911

Laws that appear especially significant--to be “landmarks”--are highlighted in bold font. Starting in 1987, the date on which a law went into effect is shown in parentheses after the description of the law.

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference Number	Description of Amendment
1911	1	Driving while in an intoxicated condition is defined to be a misdemeanor.
1917	1	Three-month forfeiture of driver’s license upon conviction for DWI.
	2	Violation of license forfeiture is defined to be a misdemeanor.
1925	1	A second or subsequent DWI is raised to gross misdemeanor status.
	2	Criminal penalty for repeat offenders shall include license revocation for three months to one year.
1927	1	First DWI offense raised to gross misdemeanor status.
	2	Prison for all offenders. Penalty for all offenders: prison 10 days to 1 year, plus fine of not more than \$1,000, plus license revocation for not longer than two years.
1937	1	All DWI offenses reduced to misdemeanor status.
	2	Criminal penalties reduced. Penalty for first offense: Prison 10 to 90 days <i>or</i> fine of \$10 to \$100, or both. License revocation. Penalty for repeat offenders: Prison 30 to 90 days <i>or</i> fine of \$25 to \$100, or both. License revocation.
1939	1	Commissioner shall revoke offenders’ driver’s licenses in accordance with recommendation of the court.
1941	1	90 day license revocation. All offenders shall have driver’s license revoked for not less than 90 days.
1955	1	Blood alcohol concentration (“BAC”) levels defined for use as evidence. Results of chemical test for level of alcohol in the blood as measured from blood, breath, urine, or saliva specimen taken from defendant within two hours of arrest, is admissible as evidence. <ul style="list-style-type: none"> ▪ BAC of .000 to .049 is <i>prima facie</i> evidence of innocence. ▪ BAC of .050 to .149 is relevant, but not <i>prima facie</i>, evidence of intoxication. ▪ BAC of .150 or greater is <i>prima facie</i> evidence of intoxication.
1957	1	Two-hour time limit (see 1955:1) changed from two hours from time of arrest to two hours from time of offense.
	2	License revocation reduced. License revocation for first offenders reduced from 90 days to not less than 30 days. Penalty for a repeat offense within three years increased to prison for 10 to 90 days, <i>plus</i> license revocation for not less than 90 days.

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1957	3	<p>Offense causing injury or death.</p> <p>Penalty for offenders causing grievous injury or death: prison 60 to 90 days, <i>plus</i> license revocation for not less than 90 days.</p>
1959	1	<p>Open Bottle Law.</p> <p>It is a misdemeanor to have an open container of alcohol in the passenger compartment of a vehicle.</p>
1961	1	<p>Implied Consent Law.</p> <p>Under civil law, a person who drives a motor vehicle on a public roadway is deemed to have given consent to a test for blood alcohol concentration by means of testing a blood, breath, urine, or saliva specimen.</p>
	2	<p>Commissioner to revoke driver's license for 6 months for test refusal.</p> <p>Under the rationale provided by the new civil Implied Consent law, Commissioner shall impose a 6-month license revocation on persons who refuse to submit to evidentiary BAC test.</p> <p>The Commissioner shall issue a twenty-day temporary license to give the person time to appeal, and the license revocation shall take effect at the end of twenty days, barring appeal.</p>
	3	Refusal to submit to evidentiary test shall <i>not</i> be admissible as evidence in criminal court.
	4	When BAC is measured by test of breath, urine, or saliva, the BAC levels defined as "relevant" and " <i>prima facie</i> " evidence of intoxication (see 1955:1) shall be increased by 20%.
1967	1	Elimination of use of saliva test to determine BAC.
	2	Two-hour time limit on collection of evidence removed.
	3	<p>BAC level of 0.10% is <i>prima facie</i> evidence of intoxication.</p> <ul style="list-style-type: none"> ▪ A BAC of 0.000--0.049 shall be considered <i>prima facie</i> evidence of innocence. ▪ A BAC of 0.055--0.099 shall be considered as relevant, but not <i>prima facie</i>, evidence of intoxication. ▪ A BAC of 0.100 or greater shall be considered <i>prima facie</i> evidence of intoxication.
	4	When BAC is measured by test of breath or urine, the BAC levels defined as "relevant" and " <i>prima facie</i> " evidence of intoxication (see 1967:3) shall be increased by 10%.
Late 1960s	1	<p>The "B-Card" restriction</p> <p>Commissioner initiates administrative policy (under authority of MS 171.04, in effect since 1957, or before) that the driver's license of a person convicted of DWI a third time within 5 years, or a fourth or subsequent time within ten years, shall be "cancelled and denied" on the grounds that the Commissioner has determined that it would be "inimical to public safety" for the person to hold a driver's license.</p> <p>The driver's license may be reinstated if the person complies with rehabilitation requirements established by Commissioner.</p> <p>Included in the administrative procedures is the important restriction now referred to as the "B-Card restriction." The person's driver's license shows the "B-Card" restriction, which, specifically, is that the person may not consume any alcohol anywhere under any circumstances.</p> <p>If the commissioner learns that the person has failed to comply with this restriction, then the Commissioner re-imposes the "cancel[ed] and deny" action on the person's driver's license.</p>
1969	1	Upon medical recommendation, court may stay imposition of criminal penalties on condition that offender submit to medical treatment.

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1971	1	<p>Criminal <i>per se</i> law enacted.</p> <p>A BAC of .10% is defined to be illegal <i>per se</i> (in itself): If an evidentiary chemical test to determine BAC shows that one-tenth of one percent (1 part per thousand) of the driver's blood is alcohol, then the driver has committed a misdemeanor. It is not necessary to prove that the driver was "intoxicated" or impaired. The BAC of 0.10% or greater is itself a misdemeanor.</p> <p>This landmark law facilitated prosecution; however, it had the unintended effect of causing the BAC level, instead of actual impairment, to become the standard for proving guilt. Drivers might be very impaired at lower BAC levels, but a BAC below 0.10% would make prosecution difficult.</p>
	2	<p>Preliminary breath test.</p> <p>Officer may utilize preliminary breath test to help determine if there are probable grounds for arrest and for request for the evidentiary test.</p>
	3	<p>Test at scene of accident, upon probable cause.</p> <p>When a person is involved in a traffic crash causing property damage, injury, or death, officer may, upon probable cause to suspect a violation, request preliminary and evidentiary BAC tests of person (under penalty of license revocation for refusal).</p>
	4	<p>The <i>per se</i> illegal BAC level of 0.10% no longer has to be increased by 10% (see 1967:4) when BAC is measured through test of breath or urine specimen.</p>
1973	1	Maximum fine for a first offense increased to \$300.00.
	2	Penalty for offenders causing grievous injury or death <i>reduced</i> to prison for 60 to 90 days, <i>or</i> fine of not more than \$300, or both, plus license revocation for not less than 90 days. (Prison is no longer mandated; see 1957:3.)
1976	1	<p>"Administrative <i>per se</i>" law enacted.</p> <p>Important landmark: Though the District of Columbia had a similar ordinance, Minnesota is the first state to enact the now almost universal "administrative <i>per se</i>" law.</p> <p>The Commissioner of Public Safety automatically imposes a 90-day license revocation on drivers found to have a BAC of 0.10% or higher. The Commissioner first issues a 20-day temporary license, during which time the driver may request a judicial hearing on the administrative revocation. (Test refusal continues to trigger a six-month license revocation; see 1961:1.)</p> <p>A request for a hearing stays imposition of the revocation.</p>
	2	Commissioner may issue limited licenses to persons whose licenses were revoked under the "administrative <i>per se</i> " law.
	3	<p>Alcohol safety programs in counties</p> <p>Counties of more than 10,000 population shall establish "Alcohol Safety Programs" to conduct alcohol problem assessments on DWI (and other) offenders. Results of assessments to be reported to the court.</p> <p>The court may stay criminal penalties and require the offender to get treatment. The court may do this on the basis of the "alcohol problem assessment" report; a medical examination of the offender is no longer required.</p>
	4	If a first-time offender complies with treatment program, the commissioner may terminate the administrative <i>per se</i> revocation after 60 days.
1978	1	<p>Administrative revocation expedited.</p> <p>Arresting officer shall serve as "agent of the commissioner" and shall confiscate the person's driver's license, forward it to the Commissioner, and shall a issue temporary license, valid for 30 days, to the person.</p>

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1978	2	Person has 30 days to request a judicial hearing on the administrative revocation for test failure or test refusal. A request for a hearing stays imposition of the revocation.
	3	Concept of BAC changed to AC (alcohol concentration). <i>Per se</i> illegal levels are separately defined for alcohol concentrations in blood, breath, and urine.
	4	Criminal penalties explicitly defined. <ul style="list-style-type: none"> For first offense: prison for not more than 90 days, or fine of not more than \$500, or both, plus license revocation for not less than 30 days. Offense within 3 years of a prior offense: prison for not more than 90 days, or fine of not more than \$500 (raised from \$300), or both, plus revocation of not less than 90 days. For offenders causing bodily harm or death: prison for not more than 90 days, or fine of not more than \$500, or both, plus license revocation for not less than 90 days.
	5	“Aggravated violations” raised to gross misdemeanor status. (An aggravated violation is the act of driving while under the influence while already under revocation for driving while under the influence.)
	6	Jurisdiction for prosecuting aggravated violations transferred from county court to district court.
	7	Upon conviction, court shall act for commissioner by taking person’s driver’s license and sending it to the commissioner, if the license has not already been taken by officer at time of arrest
	8	Court shall give due consideration to alcohol problem assessment report.
	9	“B-Card restriction” upon implied consent violation. Commissioner shall “cancel and deny” driver’s license of persons who incur a third incident in five years, or a fourth or subsequent incident in 10 years, where incident is defined as <i>either</i> an implied consent violation <i>or</i> an impaired driving conviction. The cancellation shall remain in effect until rehabilitation requirements imposed by the commissioner are proven to have been met. Licenses reinstated will include the “B-card restriction” (requiring total abstinence, 24 hour a day). Formerly, license cancellation and denial, and the B-card restriction if reinstated, was only applied upon a third <i>criminal</i> conviction. (See entry under “late 1960s.”)
1980	1	A request for testimony of person who performed laboratory analysis must be received at least ten days in advance of judicial hearing on administrative revocation, and, also, at least ten days in advance of trial.
1981	1	Court may not stay imposition of the license revocation under criminal law (but may still order a limited license to be issued).
1982	1	At a crash scene, upon probable cause, officer may arrest a person for driving while under the influence, without warrant, regardless of whether officer witnessed violation.
	2	Officer no longer required to offer blood test.
	3	Temporary license issued by officer at time of arrest is valid for 7 days (reduced from 30).
	4	Request for judicial hearing no longer stays revocation from taking effect. Defense attorneys had used the mechanism of requesting a judicial hearing on the administrative revocation as a tactic to delay and weaken the state’s case. This landmark change, whereby the hearing request no longer stays imposition of the revocation, caused hearing requests filed with Attorney General’s Office to decrease from about 1,000 per month to about 100 per month.
	5	Judicial hearing procedure expedited. “The hearing shall be held at the earliest practicable data, and in any event no later than 60 days following the filing of the petition for review.”

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1982	6	Administrative review of the Implied Consent revocation. Establishes procedure, independent of judicial hearing, for administrative review (by commissioner) of administrative revocation. A request for administrative review shall not stay imposition of revocation.
	7	A request for testimony of person who drew blood must be received at least ten days in advance of judicial hearing on administrative revocation, and, also, at least ten days in advance of trial.
	8	Alcohol concentration test result on specimen taken within two hours of offense is deemed to be alcohol concentration at time of offense. (Ruled unconstitutional; see 1984:4)
	9	Absence of alcohol concentration test shall be admissible as evidence. (Compare with 1961:3 and 1983:2.)
	10	Repeat offender definition expanded. Definition of second offender expanded to include those who had a prior conviction within 5 (increased from 3) years of current incident.
	11	Repeat offenses raised to gross misdemeanor status. Second offense within 5 years, and third-or-subsequent offense within ten years, raised to gross misdemeanor status.
	12	Longer revocation lengths, under criminal law, upon conviction for third and subsequent offenders.
	13	Courts may no longer require commissioner to issue limited license.
	14	License revocation imposed on second-time offenders to remain in effect until completion of court-ordered treatment program, if any.
	15	0.07--0.09 AC provision. Upon a report to the Commissioner that a driver had an AC of 0.070 to 0.099, and if this report is the second such report within two years, the Commissioner shall order the person to submit to an alcohol problem assessment, and to treatment, if indicated by the assessment. The Commissioner shall impose a 90-day license revocation if the driver fails to comply.
1983	1	Officer in fresh pursuit may cross geographic limit of his or her jurisdiction to stop and arrest suspect.
	2	Refusal to take evidentiary test is admissible as evidence in trial. (See 1961:3 and 1982:9.)
	3	Offenders from other states. Repeat offenses and aggravated offenses by drivers from other states shall be subject to the gross misdemeanor charge if driver's state of residence has statute in conformity with Minnesota's criminal DWI statute.
	4	Jurisdiction for prosecuting aggravated violations transferred from district court back to county court. (See 1978:6.)
1984	1	Evidentiary test made mandatory. New language is added to the Implied Consent Notice, read to the offender at arrest, stating that Minnesota law requires the test to be performed. (As before, if the offender refuses the test, the refusal shall trigger license revocation. Language is more explicit now.)
	2	Administrative revocation for test refusal increased from 6 months to 1 year.
	3	Longer revocation for juveniles. Juveniles who refuse to take, or who take and fail, the evidentiary test shall experience the normal administrative revocation, or revocation until 18 years of age, whichever is longer. Also, adults who had adjudications for impaired driving as juveniles may be subject to the gross misdemeanor penalties provided for repeat offenders.

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1984	4	Alcohol concentration of 0.10% or greater, as measured within 2 hours of offense, is made a criminal offense <i>per se</i> . (See 1982:8.)
1987	1	County alcohol safety program expanded. All counties (not just those over 10,000 population) must establish an Alcohol Safety Program (see 1976:3) for the purpose of conducting alcohol problem screenings, and for conducting comprehensive chemical use assessments on persons whom screenings show as having a possible problem. (Effective 8/1/87)
	2	Violators to pay chemical use assessment fee. All violators shall pay a \$75 chemical use assessment fee. Money collected to be credited to newly created "Drinking and Driving Repeat Offense Prevention Account." (8/1/87)
	3	Snowmobile operation while impaired and ATV operation while impaired made comparable to normal motor vehicle operation while impaired. (8/1/87)
1988	1	Mandatory License Plate Impoundment Law. Courts mandated to order certain repeat violators to surrender license plates for all vehicles which they own or lease. The following shall be subject to mandatory license plate impoundment: <ol style="list-style-type: none"> 1. A person who incurs a violation within 5 years of three prior incidents. 2. A person who incurs a violation within 10 years or four or more prior incidents. (8/1/88)
	2	Special series license plates. "Special Series" license plates for vehicles may be issued if the violator obtains a limited license or if others in violator's household have a need to operate the vehicle whose plates have been impounded. (8/1/88) (The "special series" plates are recognizable by officers, but not by the general public, as signifying a vehicle whose normal license plates have been impounded.)
	3	Mandatory minimum criminal sentences. Mandatory minimum sentences established for certain repeat violators (a person who incurs an offense within 5 years of a prior incident, or who incurs an offense within 10 years of two or more prior incidents): 30 days imprisonment, or 8 hours of community service for each day less than 30 days served. (8/1/88)
1989	1	Test refusal by repeat violators criminalized. It is a gross misdemeanor to refuse an alcohol test if the person has one prior incident within 5 years or two or more prior incidents within 10 years of the current incident. (8/1/89)
	2	Commercial Driver License "disqualification" introduced. The Commissioner of Public Safety shall disqualify a person from operating a commercial motor vehicle (CMV) if the person refuses an alcohol concentration test, or takes the test and has an AC of 0.04% or greater. Length of disqualification to be as follows: First violation: 1 year. If violation involved hazardous materials: 3 years. If violation is a second or subsequent violation on record: 10 years. (1/1/90)
1990	1	Administrative license plate impoundment law. Mandatory license plate impoundment (see 1988:1) changed from judicial implementation to administrative implementation (by Commissioner of Public Safety), and arresting officer shall act as agent of commissioner and impound license plates at time of arrest. (1/1/91)
	2	Procedure established for administrative review of plate impoundment action. (1/1/91)

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1990	3	Impaired driving at a railroad crossing raised to gross misdemeanor status. (8/1/90)
	4	Comprehensive chemical use assessment on all violators. The requirement that all violators submit to a preliminary alcohol problem screening (and then a comprehensive assessment if the screening indicates that there may be a chemical dependency problem) is eliminated and replaced by the requirement that all violators submit to a comprehensive chemical use assessment. (8/1/90)
	5	A new level (third in the list below) of criminal vehicular operation (CVO) offense is added. The categories now are: Criminal Vehicular Operation resulting in <ol style="list-style-type: none"> 1. death. 2. great bodily harm. 3. substantial bodily harm (new). 4. death to an unborn child. 5. injury to an unborn child. (8/1/90)
	1	Establishes 1-year pilot program to test efficacy of ignition interlock devices. (8/1/91)
	2	Counties authorized to channel offenders “considered to be of high risk to the community” into a pilot program of intensively supervised probation. (8/1/91)
1992	1	Any test refusal is defined to be a crime (1/1/93). (Previously, test refusal by a repeat violator was a crime. See 1989:1).
	2	Violations triggering mandatory license plate impoundment (see 1988:1) expanded to also include: <ol style="list-style-type: none"> 1. any “aggravated violation” (see 1978:5). 2. any violation that causes the Commissioner to cancel and deny the person’s driver’s license on the grounds that operation of a vehicle by the person would be inimical to public safety. (See entry under “late 1960s.”) (1/1/93)
	3	Chemical dependency assessment fee (see 1987:2), required of all violators except those determined indigent, raised from \$76 to \$125. (7/1/92)
	4	Vehicle Forfeiture law. If a person is convicted of <ol style="list-style-type: none"> 1. impaired driving within 5 years of 3 prior incidents, or 2. impaired driving within 10 years of four or more prior incidents, or 3. aggravated impaired driving, or 4. any violation that causes the Commissioner to cancel and deny the person’s driver’s license on the grounds that operation of a vehicle by the person would be inimical to public safety, then the vehicle used in the offense is subject to impoundment and forfeiture. (1/1/93)
	5	“Hard revocation” periods established. A person shall not be eligible to obtain a “limited license” for a certain length of time (-- the “hard” period of the revocation). The hard periods are as follows: <ul style="list-style-type: none"> ▪ for a first incident: 15 days. ▪ for a subsequent incident: 90 days. ▪ for a test refusal: 180 days. (1/1/93)
	6	Recidivism problem study commission established. “Commission on Confinement and Treatment of DWI Recidivists.” (1/1/93)

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment												
1992	7	<p>Test may be compelled by force in event of CVO.</p> <p>Test for alcohol and/or controlled substances may be compelled (by force if necessary) if there is probable cause to suspect criminal vehicular operation.</p> <p>Since 1961, an officer may “require” a test, but a person might refuse (triggering license revocation). Now, in the event of suspected CVO, officer may require, and compel by force if necessary, the test. (1/1/93)</p>												
1993	1	<p>“Not-a-Drop” law enacted.</p> <p>Upon notification by a court that a person under the age of 21 has been found to have any quantity whatsoever of alcohol or of a controlled substance, the Commissioner of Public Safety shall revoke the driver’s license of the under-age person. (6/1/93)</p>												
	2	<p>Child Endangerment law enacted.</p> <p>It is a gross misdemeanor for a person to drive while impaired and there is a child in the vehicle who is under the age of 16 and who is more than 36 months younger than the offender. (8/1/93)</p>												
	3	<p>Length of “hard revocation” (see 1992:4) increased to 1 year if the violation includes a conviction for criminal vehicular operation. (1/1/94)</p>												
1994	1	<p>“Habitual Offender” penalties established.</p> <p>A person who incurs 6 or more incidents in 10 years, or 8 or more in 15 years, must be sentenced to a minimum of 1 year incarceration or to a program of intensively supervised probation. (8/1/94)</p>												
1996	1	<p>Not-a-drop violation raised to misdemeanor status.</p> <p>In addition to license revocation by the commissioner of Public Safety, the “not-a-drop” violation (see 1993:1) is defined to be a misdemeanor offense. (8/1/96)</p>												
	2	<p>Additional test for controlled substances permitted.</p> <p>Arresting officer is explicitly authorized to require a blood or urine specimen, even after a breath test has been performed, if the officer has reason to believe the person was impaired by a substance not susceptible to analysis by means of a breath test. (8/1/97)</p>												
	3	<p>Criminal Vehicular Operation expanded.</p> <p>A new level (fourth in the list below) of criminal vehicular operation (CVO) offenses is added. The categories now are: Criminal Vehicular Operation resulting in:</p> <table><tr><td>1. a fatality.</td><td>4. bodily harm (new).</td></tr><tr><td>2. great bodily harm.</td><td>5. death to an unborn child.</td></tr><tr><td>3. substantial bodily harm.</td><td>6. injury to an unborn child.</td></tr></table> <p>(8/1/96)</p>	1. a fatality.	4. bodily harm (new).	2. great bodily harm.	5. death to an unborn child.	3. substantial bodily harm.	6. injury to an unborn child.						
1. a fatality.	4. bodily harm (new).													
2. great bodily harm.	5. death to an unborn child.													
3. substantial bodily harm.	6. injury to an unborn child.													
1997	1	<p>Special provisions for high-AC (0.20% or higher) offenders established.</p> <p>Driving while having an Alcohol Concentration of 0.20% or higher is defined to be a gross misdemeanor.</p> <p>Length of Commissioner’s administrative revocation is doubled from that imposed on violators who test below 0.20%. Revocation lengths therefore are:</p> <table><tr><td></td><td><u>BAC less than 0.20</u></td><td><u>BAC 0.20+</u></td></tr><tr><td>First incident</td><td>90 days</td><td>180 days</td></tr><tr><td>Second incident within 5 years</td><td>180 days</td><td>360 days</td></tr><tr><td>Incident by violator under 21</td><td>6 months</td><td>one year</td></tr></table> <p>(1/1/98)</p>		<u>BAC less than 0.20</u>	<u>BAC 0.20+</u>	First incident	90 days	180 days	Second incident within 5 years	180 days	360 days	Incident by violator under 21	6 months	one year
	<u>BAC less than 0.20</u>	<u>BAC 0.20+</u>												
First incident	90 days	180 days												
Second incident within 5 years	180 days	360 days												
Incident by violator under 21	6 months	one year												

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1997	2	<p>New offense category, “Enhanced Gross Misdemeanor,” with stricter criminal penalties, established.</p> <p>The following violations are defined to be “enhanced gross misdemeanors:”</p> <ol style="list-style-type: none"> 1. Driving while impaired within 10 years of two prior incidents. 2. Driving with an AC of 0.20% or higher within ten years of a prior incident. 3. Child Endangerment (see 1993:2) within 10 years of a prior incident. 4. Driving while impaired and not stopping at a railroad crossing within 10 years of a prior incident. (1/1/98)
	3	<p>Officer authorized to stop vehicle bearing special plates.</p> <p>Officer is explicitly authorized to stop a vehicle bearing “special series” plates (see 1988:2) to determine if the driver “is operating the vehicle lawfully.” (1/1/98)</p>
	4	<p>Procedure established for “administrative forfeiture” of violator’s vehicle.</p> <p>Prior to this, vehicle forfeiture was conducted through a judicial forfeiture procedure. Now, law enforcement agencies may impound a vehicle and institute forfeiture procedures. The following violations will cause the vehicle used in the violation to be subject to administrative forfeiture:</p> <ol style="list-style-type: none"> 1. a violation within 5 years of 2 prior incidents. 2. a violation within 15 years of 3 prior incidents. 3. a violation that includes child endangerment within 5 years of 1 prior incident. 4. a violation that includes child endangerment within 15 years of 2 prior incidents. 5. a violation that includes a high AC within 5 years of 1 prior incident. 6. a violation that includes a high AC within 15 years of 2 prior incidents. (1/1/98)
	5	<p>Violations that trigger license plate impoundment (see 1988:1 and 1992:2) are greatly expanded to include:</p> <ol style="list-style-type: none"> 1. a violation within 5 years of a prior incident. 2. a violation within 15 years of two or more prior incidents. 3. an “aggravated violation” (see 1978:6). 4. a violation that includes a high AC (.20% or higher). 5. a violation that causes the Commissioner to cancel and deny the person’s driver’s license on the grounds that operation of a vehicle by the person would be inimical to public safety. (1/1/98)
1998	1	<p>Program to use “remote [home] electronic alcohol monitoring” established.</p> <p>Judges who sentence offenders to a program of intensively supervised probation (see 1991:2) are authorized to require violators to submit to a program of remote electronic alcohol monitoring. Unless determined indigent, offenders to pay the per-diem cost of the program. (8/1/98)</p>
	2	<p>Increased fee for special series plates.</p> <p>Fee for issuing “special series” license plates to violators whose normal license plates have been impounded is increased from \$25 (for an unspecified number of vehicles) to \$50 for each vehicle for which special series plates are issued. (8/1/98)</p>
1999	1	<p>Enhanced gross misdemeanor repealed.</p> <p>Use of the term “enhanced gross misdemeanor” as a new category of offense (see 1997:2) is repealed, but the expanded penalty provisions for the offenses that had been identified as “enhanced gross misdemeanors” are retained.</p> <p>Also, courts are explicitly authorized to substitute a program of intensively supervised probation, with electronic home alcohol monitoring, in place of the mandatory incarceration periods. (5/25/99)</p>

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
1999	2	<p>Prior violations involving snowmobile, ATV, or motorboat to be counted.</p> <p>Makes explicit that violations triggering the revocation of snowmobile, all-terrain vehicle, or motorboat operating privileges are to be included among the types of prior violations counted in determining the charge (misdemeanor or gross misdemeanor) made for a current incident. (8/1/99)</p>
2000	1	<p>All existing impaired-driving statutes are repealed.</p> <p>All provisions of impaired-driving law, with some amendments, are recodified as Minnesota Statute 169A, which provides that “this chapter may be cited as the Minnesota Impaired Driving Code.”</p> <p>Chief among the statutes repealed are:</p> <ol style="list-style-type: none"> 1. MS 168.042, the license plate impoundment law. (incorporated into 169A.60). 2. MS 169.121, the main criminal impaired driving law. (incorporated into 169A.20 to 169A.48). 3. MS169.1211, “alcohol-related” driving by commercial vehicle operators. (incorporated into 169A.20, 169A.31, and 169A.50 to 169A.53). 4. MS 169.122, the “open-bottle law.” (incorporated into 169A.35). 5. MS 169.123, the main civil (“Implied Consent”) impaired driving law. (incorporated into 169A.50 to 169A.53). 6. MS 169.124 through MS 169.126, mandating counties to provide Alcohol Safety Programs to conduct chemical use assessments on persons convicted of an offense (when the arrest that led to the conviction was for an impaired driving offense). (incorporated into 169A.70). 7. MS 169.1265, authorizing use of intensively supervised probation programs in lieu of incarceration. (incorporated into 169A.73 and 169A.74). 8. MS 169.1217, providing for vehicle forfeiture, administrative and judicial procedures. (incorporated into 169A.63). 9. MS 169.126 defining an “aggravated violation.” Concept of “aggravated” violations is re-defined in terms of “aggravating factors.” (incorporated into 169A.20 through 169A.275). <p>The Not-A-Drop law for underage drivers is incorporated into 169A.33. (1/1/01)</p>
	2	<p>First-, Second-, and Third-Degree Impaired Driving offenses introduced, determined by number of “aggravating factors.”</p> <p>Concept of aggravating factors introduced. Aggravating factors are defined to be:</p> <ol style="list-style-type: none"> 1. Child endangerment (see 1993:2). 2. Having a high (0.20% or higher) alcohol-concentration (see 1997:1). 3. Each prior incident within ten years counts as 1 aggravating factor. <ul style="list-style-type: none"> ▪ A <i>first-degree</i> impaired driving offense is an impaired driving offense with two or more aggravating factors, and is a gross misdemeanor. ▪ A <i>second-degree</i> impaired driving offense is an impaired driving offense with one aggravating factor, and is a gross misdemeanor. ▪ A <i>third-degree</i> impaired driving offense is an impaired driving offense with aggravating factors, and is a misdemeanor. (1/1/98)

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
2000	4	Mandatory license plate impoundment violations (see 1988:1 and 1997:5) further expanded to also include: <ol style="list-style-type: none"> 1. any violation involving child endangerment (see 1993:2). 2. an incident within 10 years of a prior incident. 3. a commercial vehicle driver license disqualification (see 1989:2) within ten years of prior such disqualification.
		(1/1/01)
	3	Custodial arrest for first-degree impaired driving. Officer is mandated to make a custodial arrest (the person must be taken into custody) if the officer has reason to believe the person committed a first-degree impaired driving offense. (1/1/01)
	5	Court is authorized to increase maximum fine by \$1,000 if offender has high AC (0.20% or higher). (1/1/01)
	6	A “working group on DWI Felony” law is established and the Commissioner of Corrections is to develop a plan for how felony level offenders may be processed.
2001	1	Felony DWI law enacted. A felony impaired driving offense is an impaired driving offense within ten years of 3 or more prior incidents. The felony penalty is stipulated: “The court shall sentence [the offender]... to imprisonment for not less than three years. In addition, the court may order the person to pay a fine of not more than \$14,000.” (Maximum prison penalty is stipulated as “not more than 7 years”.) The new categorization of offense levels is as follows: <ol style="list-style-type: none"> 4. First-degree impaired driving offense: felony. 5. Second-degree impaired driving offense (two or more aggravating factors): gross misdemeanor. 6. Third-degree impaired driving offense (1 aggravating factor): gross misdemeanor. 7. Fourth-degree impaired driving offense (no aggravating factors): misdemeanor.
		(8/1/02)
	2	Driver license reinstatement fees increased. The total fee had been \$250.00 with a \$40 surcharge (total \$290). That total is increased to: <ol style="list-style-type: none"> 1. \$395 (\$250 fee and \$145 surcharge) effective July 1, 2002. 2. \$630 (\$250 fee and \$380 surcharge) effective July 1, 2003.
	3	Custodial arrest for first- and second-degree impaired driving. Officer is mandated to make a custodial arrest (the person must be taken into custody) if the officer has reason to believe the person committed a first-degree or a second-degree impaired driving offense. (See 2000:3.) (8-1-02)
	4	Two new misdemeanor crimes are defined. <ol style="list-style-type: none"> 1. It is a misdemeanor for a person whose vehicles has had its license plates impounded to drive any vehicle. 2. It is a misdemeanor for a person who purchases a vehicle, the plates for which have been impounded, to allow the violator to drive the vehicle.
		(8/1/02)

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
2002	1	<p>License cancellation (and “B-Card restriction” upon reinstatement) triggered earlier.</p> <p>Under the commissioner’s authority to withhold a driver’s license from persons whose driving behavior is determined to be “inimical to public safety,” a third impaired driving incident within 5 years, or a fourth or subsequent one within ten years, triggered the Department of Public Safety to “cancel and deny” the person’s driver’s license, until rehabilitation is established. If the license is reinstated, it carries the “B-Card restriction,” requiring total abstinence 24 hours a day.</p> <p>By administrative rule, the triggering of the license cancellation (and B-Card restriction if reinstated) is advanced to a third or subsequent impaired driving incident within ten years.</p> <p>(See entry under late 1960s, and 1978, 9).</p> <p>(November, 2002).</p>
2003	1	<p>Two inadequate breath samples constitute refusal.</p> <p>In submitting to the breath alcohol test, if a person fails to provide two samples of breath that are adequate for the chemical test to be performed, that failure shall “constitute a refusal” to provide a breath test. (8/1/03)</p>
	2	<p>Test refusal increased to gross misdemeanor offense.</p> <p>A impaired driving incident with no aggravating factors that involves a refusal to take the alcohol concentration test is made a third-degree impaired driving offense: a gross misdemeanor. (8/1/03)</p>
	3	<p>Prior not-a-drop violations not counted in determining degree.</p> <p>If an offender had a prior “not-a-drop” law violation (see 1993:1), and that prior violation did not involve a criminal impaired driving offense or an implied consent violation, then that prior violation shall not be included as a prior incident for purposes of determining the degree of the current incident. (8/1/03)</p>
2004	1	<p>The <i>per se</i> illegal alcohol concentration level is reduced from 0.10% to 0.08%.</p> <p>The new 0.08% illegal <i>per se</i> level applies to criminal offenses and civil law violations. That is, effective August 1, 2005, driving while having an alcohol concentration of 0.08% or higher is <i>per se</i> a criminal offense that will trigger criminal penalties. It is also a civil (Implied Consent) law violation that triggers the Commissioner of Public Safety to impose license revocation or cancellation actions on the violator. (8/1/05)</p>
	2	<p>Commercial Driver License Disqualification made more stringent.</p> <p>The Minnesota Legislature adopts law that Minnesota shall enforce US Department of Transportation Federal Motor Carrier Safety Administration requirements regarding disqualifying persons from operating commercial motor vehicles. Those requirements (as of 2006) provide that:</p> <ol style="list-style-type: none"> 1. if a person is convicted of test refusal or of impaired driving (in any vehicle, not just a commercial vehicle), for a first time, he or she shall be disqualified from operating a commercial vehicle for one year. 2. If the conviction was for an incident involving transport of hazardous materials, the disqualification shall be for three years. 3. Any second test-refusal or impaired-driving conviction shall trigger <i>lifetime</i> disqualification.

Appendix C: Minnesota Impaired Driving Legislation Chronology

Year passed	Reference number	Description of Amendment
-------------	------------------	--------------------------

2010	1	DWI Sanctions Strengthened; Ignition Interlocks Required.
------	---	--

Legislation adopted to strengthen sanctions against DWI offenders and require certain offenders to use ignition interlock devices. The legislation becomes effective July 1, 2011, and aims to enhance road safety to prevent alcohol-related crashes which account for one-third of all Minnesota traffic deaths annually. The legislation gives DWI offenders a chance to regain driving privileges by ensuring safe and legal driving through the use of interlocks. Interlock devices are installed in a vehicle and require a driver to provide a breath sample in order for the vehicle to start. The vehicle will not start if the device detects an alcohol-concentration level of 0.02 or above after the driver blows into its tube. Interlocks require rolling re-tests after the initial test, and have features to deter others from starting the vehicle for the intended user. The legislation includes:

1. DWI offenders with a 0.16 and above alcohol-concentration level will be required to have ignition interlock devices installed on any vehicle they drive.
2. DWI offenders with a 0.16 and above alcohol-concentration level that choose not to use ignition interlocks will not have driving privileges ranging from one year to six years — depending on offense level. Offenders with three or more DWIs in a 10-year period will be required to use interlocks.
3. Interlock users will regain full driving privileges immediately after the offense, ensuring they are driving with a valid license and not a threat on the roadway.
4. Interlocks will be used to monitor chronic DWI offenders (three or more DWIs in 10 year period) to verify chemical use.

(05/18/10)

Minnesota law dealing with impaired driving is complex. The chronology above is selective. Not all amendments can be described in detail. (See the “Overview of Minnesota’s DWI Laws” by Jim Cleary and Rebecca Pirius, reprinted as Appendix D, for a complete and accurate description of current law and practice). Persons with expertise in this area are encouraged to notify us if any errors are discovered.

Many House Research Department publications are also available on the Internet at: www.house.mn/hrd/hrd.htm.

Prohibited Behaviors

Minnesota's DWI law stipulates that it is a crime:

1) to drive, operate, or be in control of any motor vehicle anywhere in the state while:

- under the influence of alcohol, a controlled substance, or (knowingly) a hazardous substance, or any combination of these;
- having an alcohol concentration (AC) of .08 (.08 means .08 percent alcohol concentration, which is 8/10,000ths by volume) or more at the time or within two hours of doing so;
- having any amount or the metabolites of a schedule I or II controlled substance, other than marijuana, in the body; or
- if the vehicle is a commercial motor vehicle, having an alcohol concentration of .04 or more at the time or within two hours of doing so; or

2) to refuse to submit to a chemical test of the person's blood, breath, or urine under [Minnesota Statutes, section 169A.52](#) (implied consent law).

Criminal Penalties

Criminal penalties upon conviction for DWI are tiered, as follows:

- **Fourth-Degree DWI** – misdemeanor, punishable by up to 90 days of jail and a \$1,000 fine (for the person's first impaired driving violation within ten years without test refusal or any aggravating factors)
- **Third-Degree DWI** – a gross misdemeanor, punishable by up to one year of jail and a \$3,000 fine (for the person's second impaired driving violation within ten years or first such violation with test refusal or another aggravating factor)
- **Second-Degree DWI** – also a gross misdemeanor (for the person's third impaired driving violation within ten years or second such violation with test refusal or one other aggravating factor, or first such violation with two aggravating factors)

- **First-Degree DWI** – felony, punishable by up to seven years' imprisonment and a \$14,000 fine (for the person's fourth impaired driving violation within ten years or anytime following a previous felony DWI or criminal vehicular operation conviction; other aggravating factors are not considered)

Aggravating Factor

This includes:

- a qualified prior impaired driving incident within the preceding ten years;
- an alcohol concentration of .20 or more upon arrest (but not for first-degree DWI); and
- the presence of a child under age 16 in the vehicle, if more than 36 months younger than the offender (but not for first-degree DWI).

Qualified Prior Impaired Driving Incident

This includes both:

- prior impaired driving convictions; and
- prior impaired driving-related losses of license (implied consent revocations) or operating privileges

for separate driving incidents within the preceding ten years involving any kind of motor vehicle, including passenger motor vehicle, school bus or Head Start bus, commercial motor vehicle, airplane, snowmobile, all terrain vehicle, off-road recreational vehicle, or motorboat in operation.

Chemical Testing

Minnesota's implied consent law assumes that a person who drives, operates, or is in control of any type of motor vehicle anywhere in the state has consented to a chemical test of breath, blood, or urine for the purpose of determining the presence of alcohol or controlled or hazardous substances in the person's body. The testing is administered at the direction of a law enforcement officer when there is probable cause that the person has committed a DWI

- has been arrested for a DWI violation;
- has been involved in a motor vehicle crash;
- has refused to take the DWI screening test; or
- has taken the screening test and it shows AC of .08 or more.

To build probable cause, the officer generally, though not always, proceeds as follows:

- observes the impaired driving behavior and forms a reasonable suspicion of an impaired driving violation
- stops and questions the driver
- administers a standardized field sobriety test (SFST)
- administers a preliminary breath test (PBT)

If, based on these screening tests, the officer has probable cause to believe that a DWI crime has occurred, he or she may arrest the person and demand a more rigorous evidentiary test of the person's breath, blood, or urine. Before administering the evidentiary test, the officer must read the implied consent advisory statement to the person, explaining that testing is mandatory, test refusal is a crime, and the person has the right to consult an attorney before taking the test. If the evidentiary test is requested without the advisory being given, then the person may be criminally charged and prosecuted following test failure or refusal, but the various administrative sanctions cannot be applied.

If the person is unconscious, consent is deemed not to have been withdrawn, and the chemical test may be administered.

The officer chooses whether the test will be of the person's breath, blood, or urine. A person who refuses a blood or urine test must be offered another type of test (breath, blood, or urine). Blood and urine tests are analyzed by the Bureau of Criminal Apprehension (BCA), with results available within about ten days. The BCA may certify chemical test results directly to the Department of Public Safety (DPS).

Administrative Sanctions

Apart from any criminal penalties that may result from a DWI arrest, the law provides for three administrative sanctions, which can commence immediately upon arrest.

1) Administrative License Revocation (ALR)

Whenever the implied consent law can be invoked during the arrest process, the person's driver's license can be withdrawn immediately following any test failure or test refusal. The person is given a seven-day temporary license to drive before the withdrawal becomes effective. The period of license withdrawal is as follows:

- **90 days** for a person with no qualified prior impaired driving incident within the past ten years and no other aggravating factor was present in the current incident (reducible to 30 days upon DWI conviction for a first-time offender)
- **six months**, if violator is under age 21
- **180 days**, if person has had a qualified prior impaired driving incident within ten years
- **double** the applicable period above, if the person was arrested with an alcohol concentration of .20 or more or while having a child under age 16 in the vehicle
- **one year**, if the person refused to submit to the chemical test of blood, breath, or urine (reducible to 90 days upon DWI conviction for a first-time violation)
- **cancelled and denied indefinitely as inimical to public safety**, pending treatment and rehabilitation for a third or more impaired driving incident within a ten-year period

The person may appeal the administrative license revocation, either administratively to DPS and/or judicially through the court. (See [Minn. Stat. § 169A.53](#) for the procedural details.)

2) Administrative License Plate Impoundment

A plate impoundment violation is an impaired driving violation involving an aggravating factor, such as any of the following:

- occurring within ten years of a qualified prior impaired driving violation by that person
- involving an alcohol concentration of .20 or more
- having a child under age 16 present in the vehicle
- occurring while the person's license has been cancelled for the person being inimical to public safety

Plate impoundment applies to:

- the vehicle used in the plate impoundment violation,
- as well as any vehicle owned, registered, or leased in the name of the violator, whether alone or jointly.

A plate impoundment order is issued by the arresting officer at the time of arrest and is effective immediately. The officer also seizes the plates and issues a temporary vehicle permit valid for seven days (or 45 days if the violator is not the owner).

The minimum term of plate impoundment is one year, during which time the violator may not drive any motor vehicle unless the vehicle displays specially coded plates and the person has been validly relicensed to drive. The violator is also subject to certain restrictions when selling or acquiring a vehicle during the impoundment period.

Specially coded license plates—signifying to law enforcement that the regular plates have been impounded for an impaired driving violation—may be issued for the vehicle(s), provided that:

- the violator has a properly licensed substitute driver;

- a member of the violator's household is validly licensed;
- the violator has been validly relicensed; or
- the owner is not the violator and is validly licensed.

It is a crime for a driver whose plates have been impounded to attempt to evade the plate impoundment law in certain specified ways, or for another person to enable such evasion.

As with the driver's license withdrawal sanction, a person incurring license plate impoundment may appeal this sanction both administratively and/or judicially through the court. (See [Minn. Stat. § 169A.60](#) for the procedural details.)

3) Administrative Vehicle Forfeiture

Minnesota's DWI law provides for vehicle forfeiture for a designated license revocation or designated offense, which is typically the third DWI violation within a ten-year period, though with one or more aggravating factors, a person's second-time or even first-time violation might qualify as well.

DWI law defines "designated license revocation" as a license revocation or commercial license disqualification for an implied consent violation within ten years of two or more qualified prior impaired driving incidents. The term "designated offense" includes a DWI violation in the first or second degree or involving a person whose driver's license is cancelled as inimical to public safety or subject to B-Card (no alcohol) restrictions.

The law provides that the arresting officer may seize the vehicle and requires that the prosecuting authority serve notice to the owner(s) of the intent to forfeit. The forfeiture is conducted administratively, unless within 30 days the owner appeals the forfeiture action by filing for a judicial determination of the forfeiture.

A vehicle is subject to forfeiture under this law only if:

- it was used in the commission of a designated offense and the driver was

convicted of that offense or failed to appear at trial on it, or

- it was used in conduct resulting in a designated license revocation and the driver either fails to seek administrative or judicial review of the revocation in a timely manner or the revocation is sustained upon review.

Other vehicles owned by the offender are not subject to forfeiture. As a protection for an owner who is not the offender, the law states that a motor vehicle is subject to forfeiture only if its owner knew or should have known of the unlawful or intended use of the vehicle.

Following completion of forfeiture, the arresting agency may keep the vehicle for its official use. However, the security interest or lease of the financial institution, if any, is protected, and the lienholder may choose to sell the vehicle at its own foreclosure sale or agree to a sale by the arresting agency. A proportionate share of the proceeds, after deduction of certain expenses, goes to the financial institution. The law provides similar protection to any innocent co-owner, as well.

Charging the Crime

DWI violations may be charged by:

- citation (very rarely done, and only if a misdemeanor);
- tab charge when booking the person into jail; and/or
- complaint prepared by the prosecutor subsequent to arrest.

In the case of a blood or urine evidentiary test, the officer typically tab charges the violator at the time of arrest for driving under the influence, which is one category of DWI crime. Then, at the person's first court appearance, the prosecutor requests continuation of the charges, pending return of the test results from the state crime lab. If the test results indicate an alcohol concentration of .08 or more, the prosecutor is allowed to add additional charges orally at the person's next court hearing. Any charging complaint that is subsequently prepared would include all relevant charges.

Mandatory Hold and Conditional Release Pretrial

When a person is arrested for a first-degree (felony) or second-degree DWI crime, the person must be taken into custody and detained until the person's first court appearance, at which time the court generally sets bail and specifies conditions of release. Unless maximum bail (\$12,000 for gross misdemeanor DWI) is imposed, a person charged with any of the following offenses may be granted pretrial release from detention, but only if the person agrees to abstain from alcohol and to submit to remote electronic alcohol monitoring (REAM) involving at least daily breath-alcohol measurements. The offenses are:

- a third implied consent or DWI violation within ten years;
- a second violation, if under 19 years of age;
- a violation while already cancelled as inimical to public safety for a prior violation; or
- a violation involving an alcohol concentration of .20 or more.

Further conditions apply to a person charged with a fourth or more violation within ten years, including:

- impoundment of the vehicle registration plates, or impoundment of the off-road recreational vehicle or motorboat itself, if one was being driven;
- a requirement for reporting at least weekly to a probation officer, involving random breath alcohol testing and/or urinalysis; and
- a requirement to reimburse the court for these services upon conviction for the crime.

Chemical Dependency Assessment and Treatment

Every person convicted of DWI or a reduced charge must submit to a chemical use assessment administered by the county (\$125 fee, plus \$5 surcharge) prior to sentencing. The court must order the person to submit to the level of treatment care recommended by the assessment, if the conviction is for a repeat offense within ten years or the conviction was for DWI with an AC of .20 or more. Treatment requirements are spelled out in DPS rules.

Rehabilitation Following Driver's License Cancellation and Denial

Chemical dependency rehabilitation is statutorily required following a person's third or subsequent impaired driving incident within ten years. Either a conviction or an administrative loss of license, or both, constitutes an impaired driving incident.

Rehabilitation is also required—by DPS administrative rule, but not by statute—of a person whose license has been cancelled for violating the no alcohol provision of a restricted driver's license—a B-Card (which can be obtained only upon successful completion of a prior rehabilitation).

By statute, DPS is authorized to administratively establish the standards for rehabilitation, and the periods of rehabilitation must be not less than one year for the person's third, and not less than two years for the person's fourth or more impaired driving violation.

Under DPS rules, however, the period of rehabilitation is tiered from one to six years, according to whether the violator has successfully completed rehabilitation previously:

- one year for the first rehabilitation
- three years for the second
- six years for the person's third or subsequent rehabilitation

According to DPS rules, rehabilitation requires, among other things, that the person:

- successfully complete chemical dependency treatment in a program that requires complete abstinence from alcohol and controlled substances;
- actively participate in a recognized chemical dependency support group;
- completely abstain from alcohol and controlled substances; and
- obtain sworn affidavits vouching to that effect from at least five other familiar witnesses (who are not relatives, an employer or employees of the person).

Mandatory Minimum Sentences

Upon conviction for DWI, repeat offenders are subject to the following mandatory minimum criminal penalties:

- **second DWI offense within ten years:**

30 days incarceration, at least 48 hours of which must be served in jail/workhouse, with eight hours of community work service for each day less than 30 served

- **third DWI offense within ten years:**

90 days incarceration, at least 30 days of which must be served consecutively in a local jail/workhouse

- **fourth DWI offense within ten years:**

180 days of incarceration, at least 30 days of which must be served consecutively in a local jail/workhouse

- **fifth DWI offense within ten years:**

One year of incarceration, at least 60 days of which must be served consecutively in a local jail/workhouse

For All Repeat Offenders

The court may order that the person spend the remainder (nonjail portion) of the mandatory minimum sentence under REAM or on home detention.

An Alternative to the Mandatory Minimum Period of Incarceration

The court may sentence the offender to a program of intensive probation for repeat DWI offenders that requires the person to consecutively serve at least six days in jail/workhouse and may order that the remainder of the minimum sentence be served on home detention.

Long-term Monitoring Required

Long-term monitoring applies to most third-time DWI offenders and all those under age 19. When the court stays part or all of a jail sentence, it must order the offender to submit to REAM for at least 30 days each year of probation.

Felony DWI Penalties

If a person is convicted of felony DWI and given a stayed prison sentence, then that person must be sentenced in accordance with the local sentencing provisions described in this section. (For more, see the Felony DWI section.)

Intermediate Sanctions and Probation

When sentencing a DWI offender, the court may impose and execute a sentence to incarcerate, or it may stay imposition or execution of sentence and:

- order intermediate sanctions without probation; or
- place the person on probation with or without supervision and under terms the court prescribes, including intermediate sanctions if prescribed.

The term “intermediate sanction” includes but is not limited to jail, home detention, electronic monitoring, intensive supervision, sentencing to service, day reporting, chemical dependency and mental health treatment, restitution, fines, day fines, community work service, restorative justice work, and work in lieu of fines or restitution.

For DWI convictions, the maximum period of the stay of sentence, is:

- two years, for a misdemeanor conviction;
- six years, for a gross misdemeanor conviction; and
- seven years, for a felony DWI conviction.

Felony DWI

Minnesota criminal law defines the term felony to mean any crime for which incarceration of more

than one year may be imposed. Under Minnesota's felony DWI law, a person who commits first-degree DWI is guilty of a felony and may be sentenced to:

- imprisonment for not more than seven years (or more than seven years if the person has other prior criminal history);
- a fine of not more than \$14,000;
- or both.

A person is guilty of first-degree DWI if the person violates DWI law:

- within ten years of three or more qualified prior impaired driving incidents (defined as prior convictions or license revocations for separate impaired driving incidents); or
- has previously been convicted of a felony DWI crime; or
- has previously been convicted of a felony-level crime of criminal vehicular homicide or injury (CVO) involving alcohol or controlled substances.

Unlike nonfelony DWI crimes, being arrested with a high alcohol concentration (.20 or more) or under circumstances of child endangerment are not defined as aggravating factors for felony DWI; instead, only qualified prior impaired driving incidents and prior convictions for felony CVO are considered.

When sentencing a person for a felony DWI offense, the court:

- must impose a sentence to imprisonment for not less than three years; and
- may stay execution of this mandatory sentence, but may not stay imposition of this sentence or sentence the person to less than three years imprisonment.

A person sentenced to incarceration in prison for felony DWI is not eligible for early release unless the person has successfully completed a chemical dependency treatment program while in prison.

The court must also order that after a felony DWI offender is released from prison, the person must be placed on conditional release for five years, under any conditions that the commissioner of corrections opts to impose, including an intensive probation program for repeat DWI offenders. If the person fails to comply with the conditions of release, the commissioner may revoke it and return the person to prison.

If the court stays execution of the mandatory prison sentence, then it must apply the mandatory penalties for nonfelony DWI offenses (jail and/or intensive probation, as described in a preceding section) and must order as well that the person submit to long-term alcohol monitoring and the level of treatment prescribed in the chemical dependency assessment. If the person violates any condition of probation, the court may order that the stayed prison sentence be executed.

The Minnesota sentencing guidelines recommend a stayed sentence of 36 months, 42 months, and 48 months for a felony DWI conviction for a person with zero, one, or two criminal history points respectively, and they specify a presumptive commit-to-prison for a person with a criminal history score of three or more.

To illustrate, a person convicted of felony DWI who has had seven qualified prior impaired driving incidents within the past ten years, but no other criminal convictions, would likely reach the threshold for a presumptive commit, as follows:

- three of those priors are used to establish the basis for enhancing the current DWI offense to a felony-level crime (but these cannot also be used to determine the person's criminal history score)
- the other four priors—provided they involved DWI convictions—count as one-half criminal history point each, for a total of two points

- one criminal history point—a custody status point—would result from the current impaired driving incident occurring while the person is on probation for a prior impaired driving incident, as would almost certainly be the case in this example

Thus, this hypothetical offender would have a criminal history score of three when facing sentencing on the current felony-level DWI offense; the person's presumptive sentence under the guidelines would be to commit to prison for 54 months. With one less qualified prior incident during the preceding ten years, the guidelines would call for a presumptive stayed sentence of 48 months.

Criminal Vehicular Homicide and Injury

Criminal law defines six levels of criminal vehicular operation (CVO)—all but one constituting felony offenses—depending on the level of injury inflicted:

- criminal vehicular homicide (causing death, but not constituting murder or manslaughter)
- great bodily harm (serious permanent injury)
- substantial bodily harm (temporary substantial injury)
- bodily harm (pain or injury—a gross misdemeanor)
- death to an unborn child
- injury to an unborn child

A common element to each of these CVO crimes is that the person causes the specified harm to another person as a result of operating a motor vehicle under any of the following conditions:

- in a grossly negligent manner
- in violation of any of the elements of regular DWI law
- where the driver who causes the accident leaves the scene in violation of Minnesota's felony fleeing law
- where a citation was issued that the vehicle was defectively maintained, the driver knew

remedial action was not taken, the defect created a risk to others, and injury or death resulted from the defective maintenance

In practice, most CVO prosecutions involve simultaneous violation of DWI law.

Under the sentencing guidelines, conviction for criminal vehicular homicide or death to an unborn child carries a presumptive commit to prison for 48 months, for an offender with no other criminal history points.

Limited Driver's License – Work Permit

A person whose driver's license has been revoked for an implied consent violation or DWI conviction may apply for a limited license to drive:

- to and from a job, or for a job;
- to chemical dependency treatment;
- to provide for the educational, medical, or nutritional needs of the family; and/or
- for attendance at a postsecondary educational institution.

However, the law requires a waiting period (i.e., hard revocation) before a suspended or revoked driver may apply for a limited license. The waiting period is:

- 15 days for a first-time implied consent or DWI violator;
- 90 days for a second-time or subsequent violator who complied with the AC test;
- 180 days for a second or subsequent-time violator who refused the test;
- one year for a person revoked for manslaughter or criminal vehicular homicide;
- if under the age of 18, for twice the applicable period above, with a minimum of 90 days;
- for twice the applicable period above, if person's AC was .20 or more at the time of violation; and
- an additional 60 days, if the license withdrawal involved use of the vehicle in commission of a felony crime or an injury accident involving failure to stop and disclose identity.

For the most part, a limited driver's license may not be issued to a driver whose license is cancelled and denied for a third or more DWI violation. However, Minnesota law authorizes DPS to issue a limited license to a person whose driver's license is revoked or cancelled if the person qualifies for participation in an ignition interlock program. (Contact DPS Office of Traffic Safety for more information.)

Restricted Driver's License – The B-Card

Driver's licensing law allows DPS to impose restrictions on a person's license to "assure safe operation." Under DPS rules, a person whose driver's license has been cancelled and denied for a third or subsequent impaired driving violation and who has successfully completed treatment and rehabilitation may apply for a restricted driver's license, a B-Card, provided that the person signs a sworn statement to never again consume any alcohol (not even in a religious service, in medication, in any other manner or amount, irrespective of whether the act involves driving).

Any violation of this "no alcohol" restriction of the B-Card results in immediate cancellation of that driver's license (but is not a crime unless it involves operation of a motor vehicle). A subsequent rehabilitation is required to regain the B-Card.

Under DPS rules, the minimum period of time for establishing rehabilitation for which the person must prove total alcohol abstinence, is:

- one year for the first rehabilitation,
- three years for the second rehabilitation, and
- six years for the third or subsequent rehabilitation.

It is only following such rehabilitation that the offender whose driver's license has been cancelled may apply for a B-Card license. The rehabilitation requirements following a B-Card violation are not mandated by statutes, but have been established administratively by DPS rules.

Violation of the “no alcohol” restriction of a B-Card while operating a motor vehicle is a gross misdemeanor.

Record Keeping

Records of implied consent license actions and DWI convictions must be retained permanently on the official driving record.

The “no alcohol” restriction of a person’s B-Card also remains in effect and on the person’s driving record permanently. A temporary law enacted in 2005 allowed B-Card holders who had gone ten years without a repeat violation to request a duplicate driver’s license without the “No Alcohol” verbiage showing under “Restrictions.” However, that law expired July 31, 2006, and as a result, there currently is no procedure by which a B-Card holder can have the “no alcohol” verbiage removed from the B-Card license.

Driver’s License Reinstatement Fees

Before becoming relicensed to drive after the period of license withdrawal stemming from an implied consent violation or DWI conviction, a person must pass the license examination and re-apply for a driver’s license and pay the following fees:

- \$250 – driver’s license (DL) reinstatement fee (basic fee)
- \$430 – surcharge on the DL reinstatement fee
- \$24 – DL application fee

The \$250 driver’s license reinstatement fee and \$430 surcharge apply to alcohol-related and CVO-related license withdrawals only; the standard reinstatement fee of \$30 applies following loss of license for other reasons.

Effective July 1, 2009, certain persons who are eligible for a public defender may pay the reinstatement fee and surcharge in two installments. A handling fee may be imposed for

utilizing the installment plan. The driver’s license expires in two years unless the second installment is paid. Full payment of the fee and surcharge is required before a person can renew a license on the standard schedule or reinstate a cancelled, revoked, or suspended license.

First-time DWI Violator Using an Off-road Recreational Vehicle or Motorboat

A violator who has no qualified prior impaired driving incident is subject only to the criminal penalty (a misdemeanor) and the loss of operating privileges for that type of vehicle.

The person is not subject to driver’s license revocation, mandatory chemical dependency assessment and treatment, mandatory conditions of release, long-term monitoring, the penalty assessment fee, or license plate impoundment.

Any person arrested for a DWI violation involving an off-road recreational vehicle or motorboat and who has a qualified prior impaired driving incident on record is subject to the same administrative sanctions and criminal penalties as the person would be if arrested while driving a regular motor vehicle.

Commercial Vehicle Driving

DWI law sets a lower per se alcohol concentration limit for driving commercial motor vehicles, .04 instead of .08, and the implied consent law allows for a chemical test upon probable cause that the commercial vehicle driver has consumed any amount of alcohol.

A person who violates the .04 standard while driving a commercial motor vehicle is subject to a period of disqualification (one year for the first violation and ten years for any subsequent violation) from commercial motor vehicle driving. The person would remain validly licensed to drive regular motor vehicles unless he or she also has violated regular DWI law by exceeding the .08 per se standard or by

driving while impaired or with any amount of certain controlled substances in the body, in which case the person would be subject to the full range of applicable penalties and sanctions of regular DWI law. In addition, a commercial motor vehicle driver who incurs license revocation or cancellation for an impaired driving violation in a personal passenger vehicle receives no special dispensations from the sanctions and penalties that apply to other drivers—the person is prohibited from driving any type of vehicle until becoming validly relicensed to drive.

School Bus Driving

DWI law provides an even stricter standard of zero tolerance for school bus driving, by making it unlawful to drive a school bus when there is physical evidence in the person's body of the consumption of any amount of alcohol. In addition to criminal penalties, such a violation also triggers cancellation of the person's school bus driving endorsement and, upon conviction, disqualification of the person's commercial driving privileges. However, as with other nonbus commercial vehicle DWI violations, the person would remain validly licensed to drive regular motor vehicles unless he or she also has violated the higher standards of regular DWI law.

Flying Airplanes

A special DWI law establishes a .04 per se standard for alcohol concentration while flying and also criminalizes test refusal. Violation is always a gross misdemeanor.

It also is unlawful to fly within eight hours of any alcohol consumption—a zero-tolerance standard, but time limited. Violation is a misdemeanor.

Special Laws for Youth

DWI laws apply equally to drivers of all ages. DWI violations require either evidence of impaired driving or an alcohol concentration of .08 or higher, or the presence of certain illegal substances in the person's body, during or within two hours of the time of driving, operating, or being in control of a motor

vehicle, broadly defined. However, two additional alcohol-related laws apply to youth under age 21.

Drivers aged 16 and 17 years old who violate the DWI laws are under the jurisdiction of the adult court, not the juvenile court. As such, they are subject to the full range of adult penalties and consequences.

The drinking age law prohibits a person who is under the age of 21 from:

- consuming alcohol without parental permission and supervision;
- purchasing or attempting to purchase alcohol;
- possessing alcohol with intent to consume;
- entering a liquor store or bar for the purpose of purchasing or consuming alcohol; or
- misrepresenting one's age for the purpose of purchasing alcohol.

A violation of this statute is a misdemeanor and carries a mandatory minimum fine of \$100. However, it does not result in suspension of the driver's license unless the person has used a driver's license, Minnesota ID card, or any type of false identification to purchase or attempt to purchase alcohol (90 days suspension).

For purposes of these laws, a person does not attain the age of 21 until 8:00 a.m. on the day of the person's 21st birthday.

Underage Drinking Driving – Zero Tolerance

Minnesota's DWI law provides misdemeanor penalties and driver's license suspension for any driver under age 21 who is convicted of driving a motor vehicle anywhere in the state while consuming alcohol or while there is physical evidence of such consumption present in the person's body. (This law applies only to the driver and not to any passengers.)

However, a violation of the zero-tolerance law for underage drinking and driving does not in

itself constitute a DWI/impaired driving violation, nor can it be used as an enhancing factor for any subsequent DWI violation.

For more information about DWI, visit the criminal justice area of our web site, www.house.mn/hrd/issinfo/crime.htm
