Before

The Excelsior Fire District Service Planning Grant, in collaboration with the Minnesota State Fire Marshals Division, was a great and successful process for us. We were at a point in our service model where we needed to expand to overnight duty crews but had the up-front challenge of the cost of dorm room construction. This grant made dorm rooms possible and, as a result, we have enhanced our overnight-in-service times, response times, critical care, staff sleep deprivation challenges, and work life balance for a predictable overnight staffing. We have made a significant staffing change to support our overnight response while directly impacting response partners including law enforcement and EMS providers. The Excelsior Fire District completely supports the MN Fire Initiative and decided it is critical to start looking at long term firefighter health and wellness as well as improved response and care. This Service Planning Grant helped immensely in us reaching these goals.
