Did you know?

Ten percent of home fires in Minnesota from 2013-2017 were caused by heating devices.

Most home fires occur in the winter and peak in January.

Most Minnesota heating fires occur in fireplaces and chimneys.

HEATING SAFETY

- Keep portable heaters three feet from anything combustible.
- Turn portable heaters off when leaving the room or going to sleep.
- Never use your oven to heat your home.
- Have your home heating system and chimney cleaned and inspected annually.
- Make sure your wood stove is properly installed and ventilated.
