INTRODUCTION

This packet contains the forms needed for a complete youth fire intervention assessment.

The Oregon Assessment Tool, included in this packet, is designed for use by youth fire intervention specialists to screen youth referred to them for a fire-related incident. This is a basic assessment tool. It is used to decide if a youth needs fire education intervention or needs to be referred to other community agencies. This tool is only the first step in the evaluation process for a youth who is using fire. It is not a risk inventory nor does it attempt to predict recidivism.

The Oregon Assessment Tool reflects the work of many fire and mental health professionals in Oregon. The format of the interview is based on the work of Laurie Birchill, LCSW. Ms. Birchill developed a screening tool for youth applying for entrance into residential treatment in 1989. Ms. Birchill's instrument proved to be user-friendly and stood the test of time. Ms. Birchill made a significant contribution to this project by refining many of her original questions. We are indeed grateful for her expertise.

The Oregon fire service participated in the research which formed the basis for the assessment tool. They recognized the need for a tool based on empirical data. During the course of the project, interventionists from over twenty fire departments participated in the development of this tool. We are grateful for the dedication of the many men and women from the Oregon fire service who worked so hard to make this a reality. Additional funding and facilitation for the assessment tool project was provided by the Oregon Office of State Fire Marshal, Youth Firesetter Intervention Unit.

Judy Okulitch - Program Coordinator
Carol Baumann - Program Specialist

The Oregon Assessment tool entailed the creation, collection and formatting of public documents. All rights to the tool are reserved and protected. Duplication of any or all of the tool must be with the express written permission of the Office of State Fire Marshal. Any changes to the tool will affect its integrity and are prohibited.

Minnesota Youth Fire Intervention Team is using this tool with permission from the Oregon Office of State Fire Marshal

Please check the Minnesota State Fire Marshal website regularly for updates on materials.

Youth Fire Intervention (Form #2)

PARTICIPATION RELEASE AND RELEASE OF LIABILITY

The Minnesota Youth Fire Intervention Team (YFIT) uses the Youth Firesetting Assessment tool that was developed by the Oregon State Fire Marshal's Office. This is a front-line actuarial tool used to evaluate a child's involvement in fire activity.

The assessment evaluates the firesetting behavior by reviewing six types of individual characteristics: demographic, physical, cognitive, emotional, motivation and psychiatric.

Based on the results of the evaluation, your child's tendencies will place him/her in one of the following areas of concern:

Some concern.....Needs educational intervention

Moderate concern.....Needs referral for evaluation by a licensed psychologist or psychiatrist and educational intervention

High concern.....Needs immediate referral for evaluation by a licensed psychologist or psychiatrist and educational intervention counseling.

If educational intervention is indicated, the Minnesota Youth Fire Intervention Team will offer further educational activity for your child. Participation in the program is not a guarantee that firesetting behavior will stop.

Depending on the individual case; the school your child attends, local law enforcement, social services, mental health or other agencies may become involved.

Upon request, the questions asked in this evaluation may be viewed prior to signing this release.

I, _____, have read the previous statement and do hereby grant permission for my child _____, to participate in the Minnesota Youth Fire Intervention program. While we do everything in our power to protect juvenile information, I authorize release of information regarding my child to such other governmental entities and agencies as may be deemed appropriate by the Intervention Specialist.

Tell me about what was burned?

Tell me about the fire.

I wonder why you wanted to burn?

Have you ever burned this before?

What other types of things have you burned?

Whose stuff did you burn?

Scoring:

- ☐_1 The object that was burned had little emotional significance for the youth. (i.e. toilet paper, leaves or trash).
- ☐_2 The object that was burned had some emotional significance for the youth (i.e. plastic army figures, other person's possessions).
- ☐_3 The object that was burned had emotional significance for the youth or someone else (i.e. sibling's crib or favorite toy, a parent's or caregiver's possession).

Comments:

- D. Where was the fire set? Was there significance to that location? Suggested questions:

Where did the fire start?

If at home: What room were you in or were you outside?

If not at home: Do you go to this place often? Do you like it there?

Scoring:

- ☐_1 The fire was started in a place where the youth plays such as his/her bedroom, a closet, a fort, a hiding place.
- ☐_2 The fire was started in a place with community significance i.e. church, a school, a park, in the forest.
- ☐_3 The fire was set in a building occupied with people with the intent to place people at-risk.

Comments:

E. How much planning was done prior to the fire? Suggested Questions:

Tell me what you were you doing right before the fire?

Did you think about how you were going to start the fire?

Where did you get the things that were burned?

What was used to light the fire? Where did it come from?

Scoring:

__1 The fire was started using available materials; the act of firesetting was spontaneous and done without planning. Matches and lighters were readily available.

__2 There was some pre-planning for the fire and some gathering of materials; however, the fire was not especially thought out.

__3 There was definite planning for the fire, materials were sought out, and matches and lighters were stashed and/or hidden at the site beforehand. Accelerants may have been used.

Comments:

F. Who was with the youth at the time of fire? Suggested Questions:

Was anyone with you when the fire started?

If yes, who?

What did they say about the fire?

SCORING AND REFERRAL PROCEDURE

Add the face value of the checked responses for both the youth and the parent interview. Enter the total on the lines provided below:

Total Score: (Youth Interview)_____ (Parent Interview)_____

If youth questions D, J and / or L were scored with a 3 response, consider referring this youth for a crisis evaluation.

If the total number for the youth interview is from 14-19 then: The fire behavior appears to be basically experimental in nature. This youth does not have a history of fire behavior. The intervention for this category is fire education for the youth and the family. There are numerous fire education intervention curricula available to use with this child. The family should set clear rules about fire use in the home and practice home fire safety. YFPI Specialists should emphasize the importance of working smoke alarms and home escape planning for these families. Younger firesetters do not understand the consequences of their actions so it is important that parents/caregivers increase their knowledge of fire safe practices.

If the total number for the youth interview is 20-42 then: The youth has a sporadic history of firesetting and needs to be referred to other community agencies that serve children and their families. Many of these youths will require a more comprehensive mental health evaluation to determine the motives for his/her behavior. Youth who score in this range are setting fires as a cry for attention, as a response to a crisis event, to express anger or to defy authority. Many youth use fire because they are seeking power and control. The firesetting in this case is often a symptom of other family, school or peer group problems.

In addition to referring the family for further evaluation, YFPI Specialists need to provide fire science education. Families often do not understand the power of fire and need to increase their knowledge of home fire safety practices. Again, emphasizing the importance of working smoke alarms and practicing home escape planning. Helping educate the youth about how their firesetting behavior affected the community and the risk involved is another way YFPI Specialists can provide a service to the youth and their family and hold youth accountable for their behavior. Curricula for educating adolescent are available.

If the total number for the parent interview is from 10-15 provide fire safety education to the youth and family.

If the number for the parent interview is between 16-30 provide fire safety education to the family and recommend to the family that they seek the services of other community agencies to further evaluate the youth's firesetting behavior.

A referral should consist of:

1. A cover letter including
 - a. Statement of the fire incident
 - b. Observations of the interviewer
 - c. recommendations
2. A copy of the release of confidential information form
3. A copy of the fire report
4. Copies of both assessment interviews and parent check list
5. A brief summary of the education provided
