

2021  
**FIRE IN  
MINNESOTA**

# MISSION

---

The Minnesota Department of Public Safety State Fire Marshal Division (SFMD) strengthens Minnesota fire-safe environments by providing statewide leadership and guidance in support of fire and life safety policy, enforcement, prevention and education.

Runs, dollar loss and deaths by county.....	41
Fire departments reporting .....	43-61

## MESSAGE FROM STATE FIRE MARSHAL JIM SMITH AND CHIEF DEPUTY AMANDA SWENSON

The year 2020 was one many people wish never happened. Minnesota, like much of the U.S., experienced the first major pandemic in several decades. COVID-19 taxed many fire departments' resources. Just when people were adjusting to the pandemic, parts of the Twin Cities metro area erupted in fires as a result of civil unrest following George Floyd's death at the hands of a Minneapolis police officer. It was a challenging year for so many, and the fire service was not exempt.

Our 2020 Fire in Minnesota report was also impacted by obstacles in data collection at all levels. Local department staffing challenges meant fewer folks at the firehouses to enter timely reports. Well-deserved retirements and other changes within the SFMD data team resulted in staff taking on new challenges and contributing in new ways. Even Federal Emergency Management Agency and the U.S. Fire Administration ultimately delayed their reporting in response to issues with their own eNFIRS online reporting system.

With such a late start and data developing well into 2021, by the time our team had settled on the final numbers for 2020, it was determined that it was too late in the game to release our usual fully fleshed-out report.

While it will not be getting its own published document just yet, we do not want to diminish what the data from 2020 means to the citizens and departments of Minnesota. A statement we often hear in the fire service is: "Lest we forget." We feel this is appropriate for 2020 as well. Lest we forget the lives lost to fire. Lest we forget the businesses, homes and communities impacted by the large fire loss during 2020. Lest we forget the impacts of COVID-19. More important than remembering is looking to the future and deciding how we can make changes so we never experience another 2020.

# 2020 NOTABLE NUMBERS

While you'll find 2020 data sprinkled throughout the pages of this 2021 report, below are some of the headlines.

Fire deaths were up. The total number of incidents was up. Fire loss numbers were up. There was destruction from civil unrest. Of course, there was also a new reporting data point — COVID-19.

There were 11,044 COVID-19 related responses by 323 fire departments in 2020. In more than 8,000 of these incidents, the patient was suspected of having COVID-19 and in almost 3,000 incidents COVID-19 was confirmed. Our data shows that 31,759 firefighters were exposed to the virus, suspected of having COVID-19, or confirmed COVID-19 patients. There are about 21,000 firefighters in Minnesota, meaning that on average every firefighter in the state was exposed about one-and-a-half times to this deadly disease.

Historically, Minnesota experiences fewer fires, fire deaths and dollar loss than the U.S. as a whole. That was not true in 2020. All of the major fire loss indicators were higher than in recent years: number of fire department responses, number of fires, number of building fires, fire loss and fire deaths.

Indeed, 2020 was a difficult year for many of us, both in our communities and in the fire service. We wish to thank you, the members of the fire service, for rising to the challenge to contribute data in what was an incredibly difficult year.

## 2020 VS. 10 YEAR AVERAGE

Measurement	2020	2010-2019 (average)	Trend
Fires per year (all types)	15,584	13,896	12% increase
Fires per day	43	38	13% increase
Building fires per year	3,712	3,298	13% increase
Building fires per day	10	9	10% increase
Dollar loss per year	\$422,112,252	\$226,503,827	87% increase
Dollar loss per day	\$1,153,312	\$620,219	85% increase
Fire deaths per year	62	49	27% increase
<b>Civil unreset period (May 28-31, 2020) compared to previous 10 years</b>			
Fires per day	111	38	192% increase
Building fires per day	54	9	500% increase
Dollar loss per day	\$11,748,761	\$620,219	1,794% increase

- The number of fire deaths in Minnesota increased 32 percent over 2019.
  - o Total Deaths: 62
  - o Leading Cause: Smoking (8)
  - o Smoke Alarms: In 54 percent of fire fatalities in buildings, smoke alarms were absent or not operating.
- Minnesota departments reported an 18 percent increase in the total number of fire department responses.
- Cooking remains the leading cause of structure fires in Minnesota.
- Dollar loss from all fires was also up 52 percent – an increase of more than \$144 million.
- A majority of incendiary fires (fires that are intentionally set) happened in residential structures. Incendiary fires caused over \$84 million in damage in residential properties.

# 2021 NOTABLE NUMBERS

- The number of fire deaths in Minnesota increased 8 percent over 2020.
  - o Total Deaths: 67
  - o Leading known Cause: Smoking (35 percent of known causes)
  - o Smoke Alarms were reported as present in only 11 out of 39 structure fire fatalities.
- Minnesota departments reported an 11 percent increase in the total number of fire department responses.
- Cooking remains the leading cause of structure fires in Minnesota.
- Dollar loss from all fires was down 22 percent – a decrease of over \$94 million.
- A majority of incendiary fires (fires that are intentionally set) happened in residential structures. Incendiary fires caused over \$8.2 million in damage in residential properties.

# TOTAL IMPACT

Arson Fire

## Fire Loss in Minnesota

In 2021, 738 of the state's 774 fire departments (95 percent of all Minnesota's fire departments) reported call data through the Minnesota Fire Incident Reporting System (MFIRS), which collects information on fires and related activities. More information about the fire department participation begins on page 43.

The total number of fire incidents reported by participating Minnesota fire departments in 2021 was 17,202 – a 10 percent increase over 2020. The number of responses by the fire service increased by 11 percent in 2021 to over 362,000.

## 2021 REPORTED FIRE DEPARTMENT RESPONSES

INCIDENTS REPORTED	Seven	% State	Balance of	% State	State Total
	County	Total	the State	Total	
	Metro Area				
Structure Fires	3,648	53%	3,260	47%	6,908
Vehicle Fires	1,258	43%	1,651	57%	2,909
Other Fires	3,036	41%	4,349	59%	7,385

Structure fires continue to occur most frequently in residential properties, including houses, apartments, boarding houses, dormitories and hotels/motels. In the last five years, an average of 4,914 fires have occurred in residential structures. These figures indicate that each year, one residential structure fire occurs for every 1,161 residents.

## STRUCTURE FIRES BY PROPERTY TYPE

STRUCTURE TYPE	2017	2018	2019	2020	2021	% change 2020-2021
Residential	4,623	4,714	4,864	5,192	5,177	(<1%)
Educational/Institutional	186	231	216	203	178	(12%)
Public Assembly/Commercial	355	392	421	575	406	(29%)

<b>TOTAL</b>	<b>6,165</b>	<b>6,130</b>	<b>6,521</b>	<b>7,094</b>	<b>6,908</b>	<b>(3%)</b>

## 2021 RESIDENTIAL STRUCTURE FIRES

TYPE OF RESIDENCE	Number of Fires	Dollar Loss	Civilian Injuries	Civilian Deaths
1 or 2 Family Dwelling	2,761	\$130,447,764	129	29
Multifamily Dwelling	1,938	\$24,122,827	50	7
Residential/Other	301	\$20,120,153	4	1
Hotel/Motel, Commercial	54	\$622,882	0	0
Residential Board & Care	41	\$169,376	0	1
Boarding/Rooming house, Residential Hotels	32	\$276,285	1	0
Dormitory-Type Residence/Other	38	\$159,850	0	0
Barracks/Dormitory	12	\$110,000	0	0
<b>TOTAL</b>	<b>5,177</b>	<b>\$176,029,137</b>	<b>184</b>	<b>38</b>

Residential fires accounted for 75 percent of all structure fires and 63 percent of total dollar loss in 2021.

The average dollar loss per structure fire in 2021 was over \$49,000 per incident. The average dollar loss per residential structure fire was over \$43,000 per incident.

## 2021 RESIDENTIAL STRUCTURE FIRES

### NOTABLE FIRES

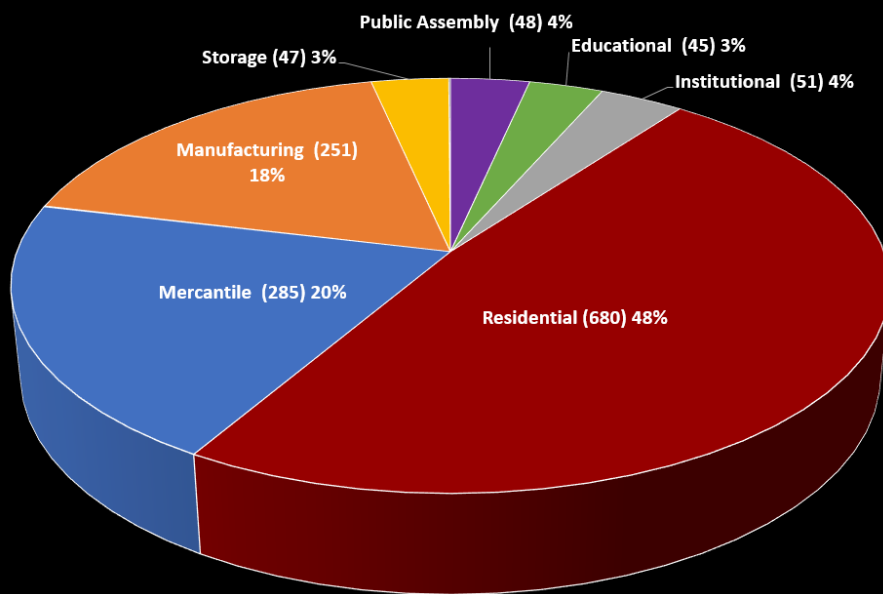

- There were 33 fires with dollar losses of \$1 million or more.
- There were two fires with dollar losses of \$5 million or more (\$5.4 million manufacturing and \$7.5 million grain elevator).
- There was one fire with dollar loss over \$9 million (live stock/poultry storage).

# SPRINKLER SAVES

There were 94 sprinkler saves in Minnesota in 2021. That means about once every four days, a fire is extinguished by an automatic fire sprinkler system. These sprinkler activations saved 94 buildings from devastation, minimized property loss, greatly reduced business interruption and potentially saved lives.

The following chart shows where the 1,409 sprinkler saves occurred between 2004-2021.

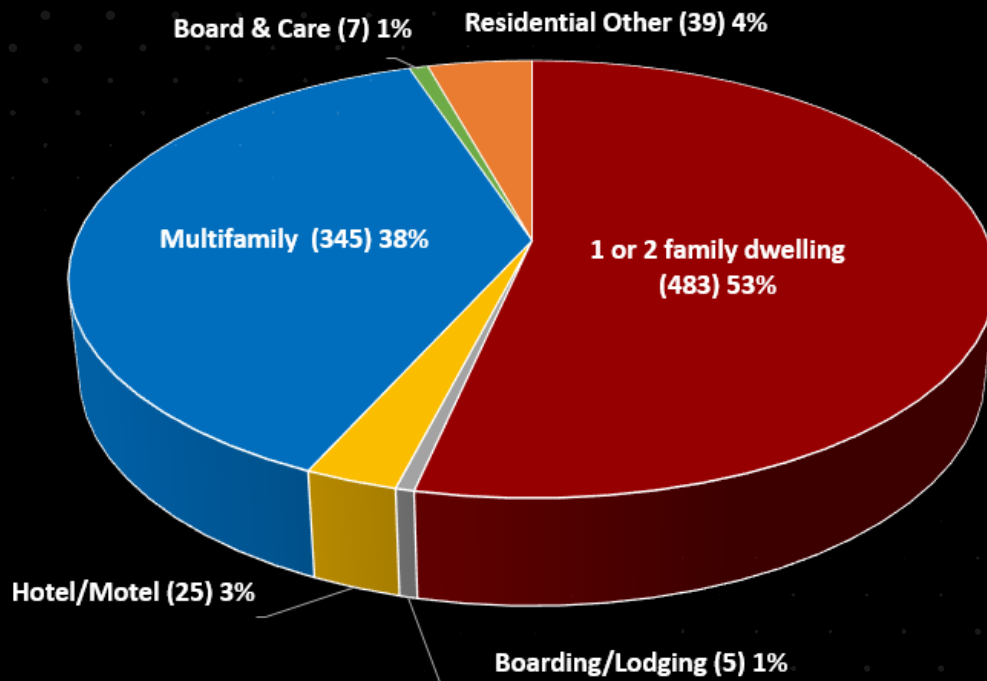

## MINNESOTA SPRINKLER SAVES 2004-2021

Sprinkler systems have been around since the late 1800s; they were originally developed to protect manufacturing and industrial occupancies. The first fire code in Minnesota to require apartment sprinklers was adopted in 1989. The most common occupancy for sprinkler saves in Minnesota is apartment buildings. In 2021 there were 48 sprinkler saves in apartment buildings. This is noteworthy as apartments are one of the newest occupancies to have sprinklers.

# SMOKE ALARM PERFORMANCE

## RESIDENTIAL OCCUPANCY FIRES WHERE SMOKE ALARMS ACTIVATED

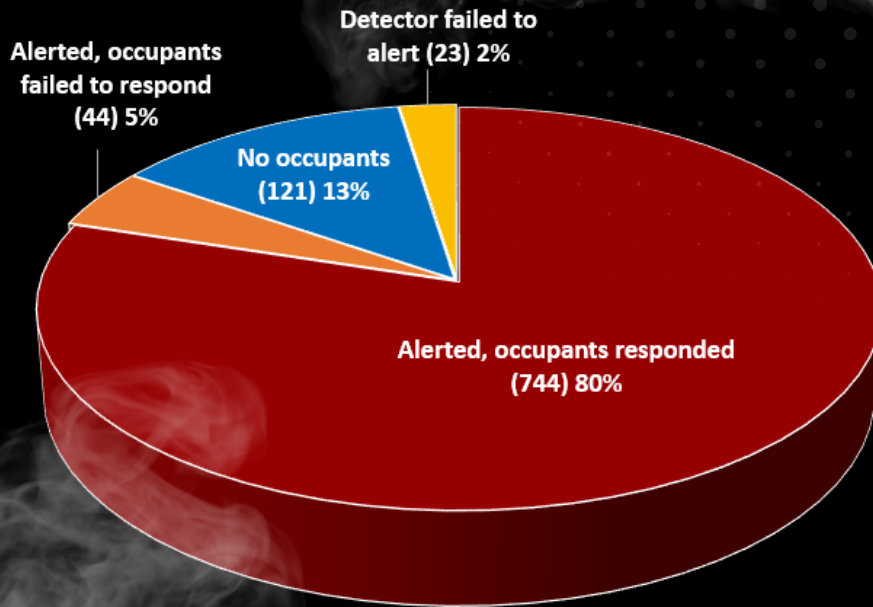

Smoke alarms are highly effective at alerting people of dangerous fire conditions, especially in residential occupancies where people sleep. In 93 percent of the residential fires in 2021, smoke alarms activated and alerted the occupants. Of concern, however, are the 67 residential fires where the occupants did not get alerted to dangerous fire conditions. Those are shown as alarms that failed to alert occupants – 2 percent – or alerted occupants, but the occupants failed to respond – 5 percent.

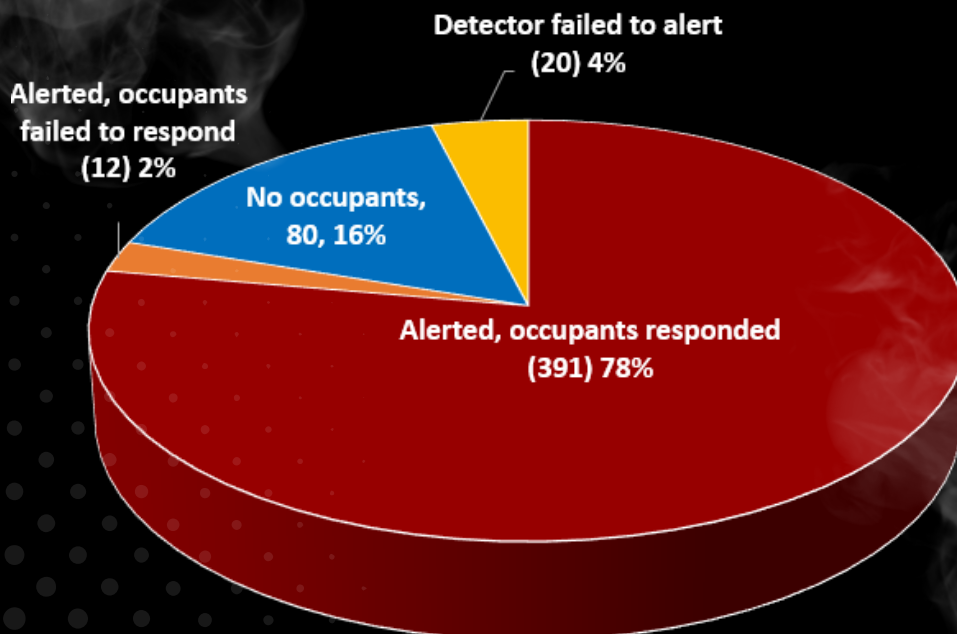

# RESIDENTIAL SMOKE ALARM EFFECTIVENESS

(All Residential Occupancies)

# ONE/TWO FAMILY DWELLING SMOKE ALARM EFFECTIVENESS

# SUMMARY

In 2021, 738 (95 percent) of Minnesota's 774 fire departments reported information for Fire in Minnesota. The total number of calls increased about 11 percent from 2020. The dollar loss was nearly \$328 million.

Fires occurred most frequently in residential properties. Residential fires occurred nearly nine times as often as fires in the next most reported type – storage properties.

Fires in residential buildings accounted for 75 percent of all structure fires, 63 percent of total dollar loss, and 97 percent of structure fire deaths in 2021. These statistics continue to identify the home as the most dangerous place to be.

In the last 33 years, more than \$6.2 billion in property was destroyed by fire; more than \$3.2 billion in damage occurred in residential properties.

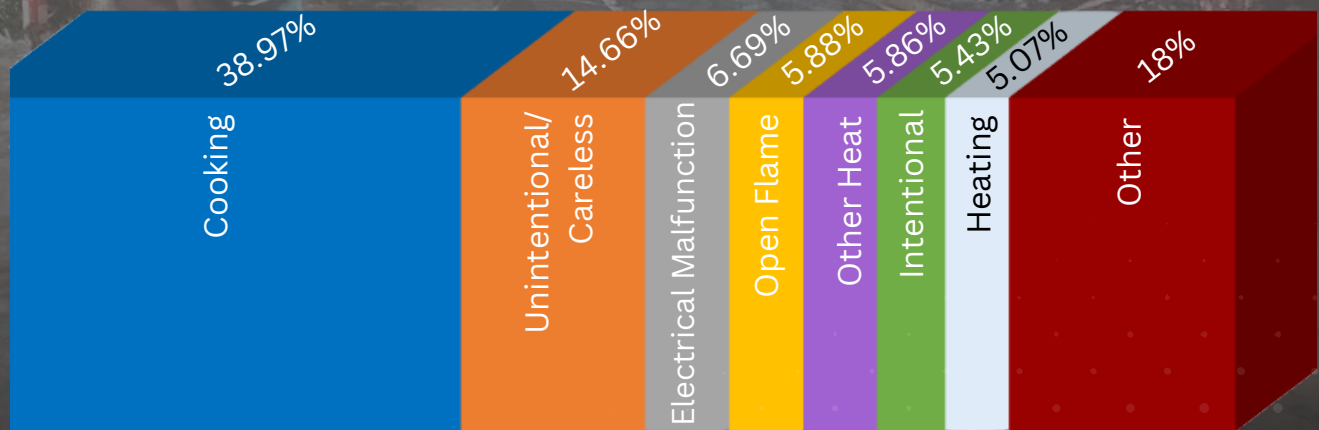

# CAUSES

---

# STRUCTURE FIRE CAUSES

As in past years, the top known cause of fires continues to be cooking, followed by careless burning and electrical fires.

The leading cause of structure fires in 2021 was cooking. Ninety-four percent of those fires were contained cooking fires.

The top three known factors in the remaining cooking fires were: equipment unattended (28 percent), combustibles too close (7 percent), and misuse of material or product (6 percent). There were four cooking-related civilian fire deaths and 19 civilian injuries, as well as nine firefighter injuries. Dollar loss from cooking fires in 2021 totaled \$6,343,559.

# HEATING FIRES

There were 282 total heating fires in 2021. Ninety-six percent of all 2021 heating-related fires occurred in residential properties. The total number of residential heating fires (270) decreased by 24 percent over 2020 but dollar loss increased by 49 percent.

## HEATING FIRES IN RESIDENTIAL PROPERTIES

EQUIPMENT	Number of		Dollar Loss	% of Total
	Incidents	% of Total		
Fireplace/Chimney	148	56%	\$1,752,420	29%
Heating Units (Fixed/Central Boilers, Furnaces, etc.)	94	34%	\$1,192,528	19%
Portable Heaters	17	6%	\$2,483,086	41%
Water Heaters	8	3%	\$355,527	6%
Other (Heat Lamps, Oil Heater, Etc.)	3	1%	\$250,600	4%
<b>TOTAL</b>	<b>271</b>		<b>\$6,034,161</b>

Bath/Lavatory, 3%

### Store/Office Property

Kitchen, 11%  
Exterior Wall, 11%  
Sales/Area, 6%  
Storage Area, 6%

# SUMMARY

Cooking caused the largest percentage of structure fires. Fires in residential spaces represent 75 percent of all structure fires and 97 percent of fire deaths in structures. While careless smoking accounts for less than 1 percent of structure fires, it caused 10 percent of known fire fatalities.

Nearly 10 percent of all reported structure fire causes were listed as “other causes.” In order to focus on fire prevention efforts where the greatest need exists, complete reporting is essential. Fire departments should provide the maximum available information on MFIRS reports.

Minnesotans continue to be in the greatest danger from fire in their own homes. Fire prevention efforts in the areas of cooking, heating and appliances must continue to be a top priority.

Residential

# FIRE PREVENTION WEEK

Since 1925, the week of Oct. 9 has been designated Fire Prevention Week in the United States in memory of the Great Chicago Fire of Oct. 9, 1871. The National Fire Protection Association has sent a special fire-prevention message to the public during Fire Prevention Week. The SFMD urges Minnesota fire departments to mark that week by encouraging public safety and leading fire prevention efforts in their communities.

# INCENDIARY FIRES

---

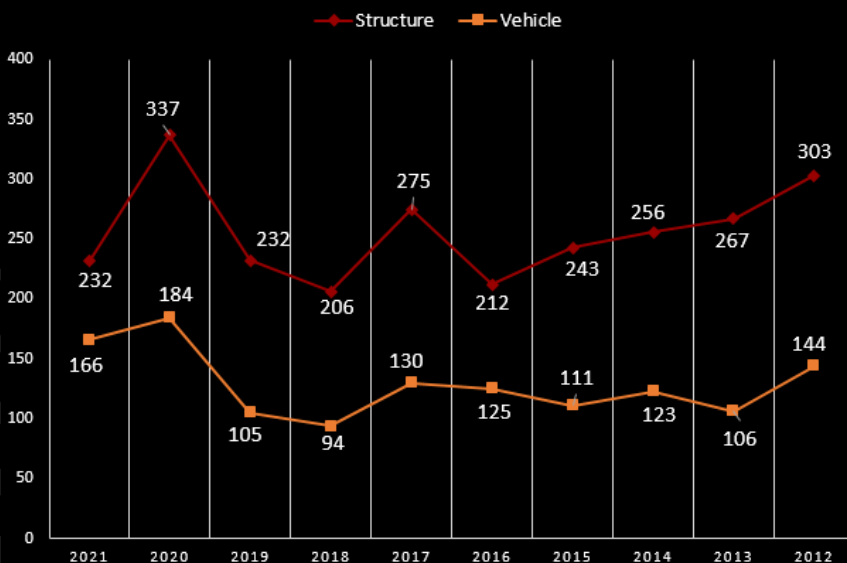

There were 1,015 identified incendiary fires in 2021, an 8 percent decrease from 2020.

The term incendiary refers to any intentionally set fire. An arson fire is an example of an incendiary fire, but not all incendiary fires are arson. Incendiary fires may also include recreational fires intentionally set that get out of control. The value of property destroyed by incendiary fires in 2021 was more than \$13.4 million.

## INCENDIARY STRUCTURE AND VEHICLE FIRES

## INCENDIARY FIRES BY BUILDING TYPE

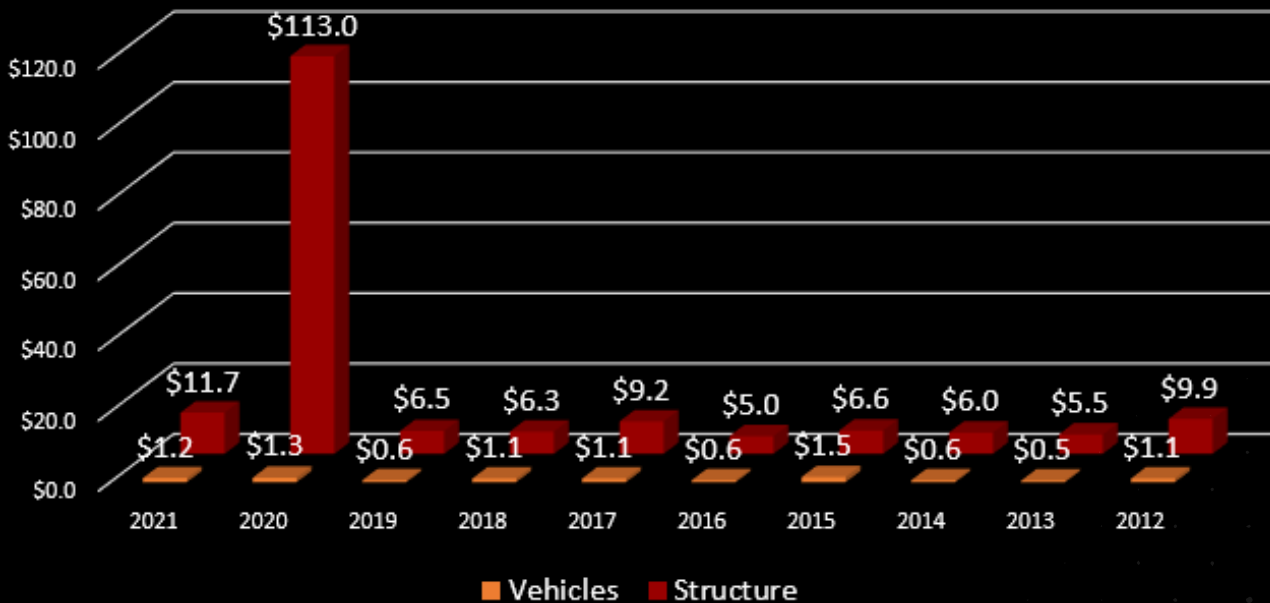

BUILDING TYPE	# OF FIRES	% OF TOTAL
Outdoor/Other	377	44%
Storage	53	6%
Assembly	48	5%
Business Office/Stores	38	5%
Residential	240	34%
Industrial	14	2%
Educational	9	1%
Institutional	10	1%
Manufacturing	3	0.40%
Unclassified	17	2%
<b>TOTAL</b>	<b>809</b>	<b>100%</b>

In 2021, “incendiary” was listed as the cause of 12 percent of all reported structure fires with known causes and 6 percent of all reported vehicle fires in Minnesota.

Vehicle incendiary dollar loss represented 3 percent of total vehicle fire dollar loss with an average dollar loss per incendiary vehicle fire of \$7,092.

Fire investigators agree that incendiary fires are under-reported. This may be especially true with vehicle fires as they may not receive as much attention as structure fires receive.

## INCENDIARY FIRE DAMAGE IN MINNESOTA (in millions)

# SUMMARY

Incendiary fires decreased slightly in 2021. Incendiary fires were the cause of 12 percent of the structure fires with known causes.

In 2021, 34 percent of all incendiary structure fires and 29 percent of all incendiary losses were in residential property.

In the past 33 years, incendiary fires caused 94 deaths and more than \$524 million in property loss.

Incendiary fires must continue to be addressed through such efforts as the Arson Reward Program and the Youth Firesetter Intervention and Prevention Programs.

## ARSON TIP LINE

Do you have a tip or information about a possible arson fire? Call the Arson Hotline at 800-723-2020. Rewards are possible for information leading to the identification of whomever is responsible for the fire.

Rewards are as follows:

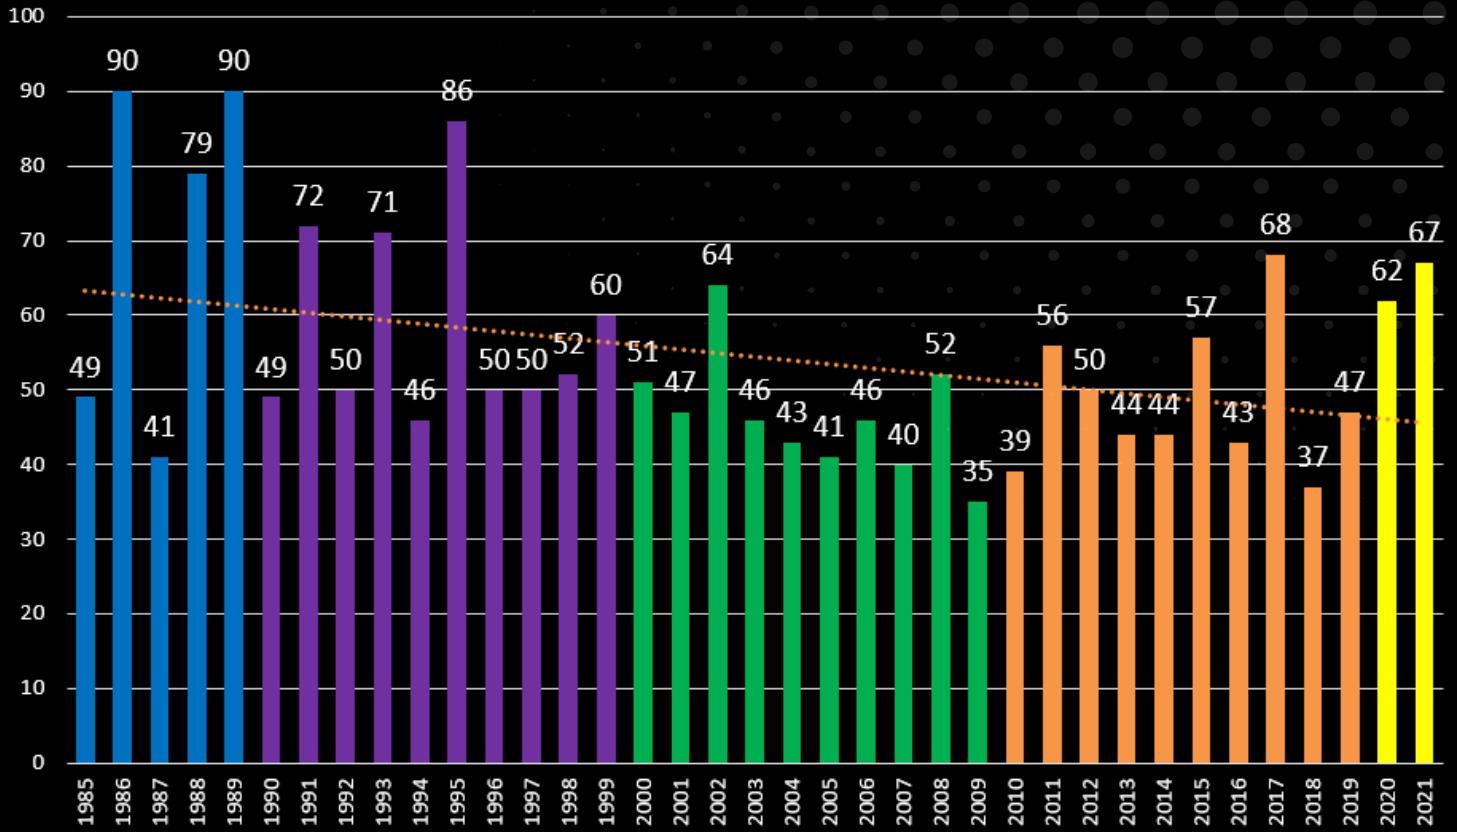

- An extraordinary reward of \$2,000 to \$5,000 for information or assistance that leads to the arrest of person(s) on a charge of arson.
- An information reward of up to \$2,000 for information in a meritorious situation with no requirement that the information lead to an arrest.
- A lesser reward for useful information which could prevent an incendiary fire or aid in catching a person who set one. There is no requirement that the information lead to an arrest.

# CASUALTIES

---

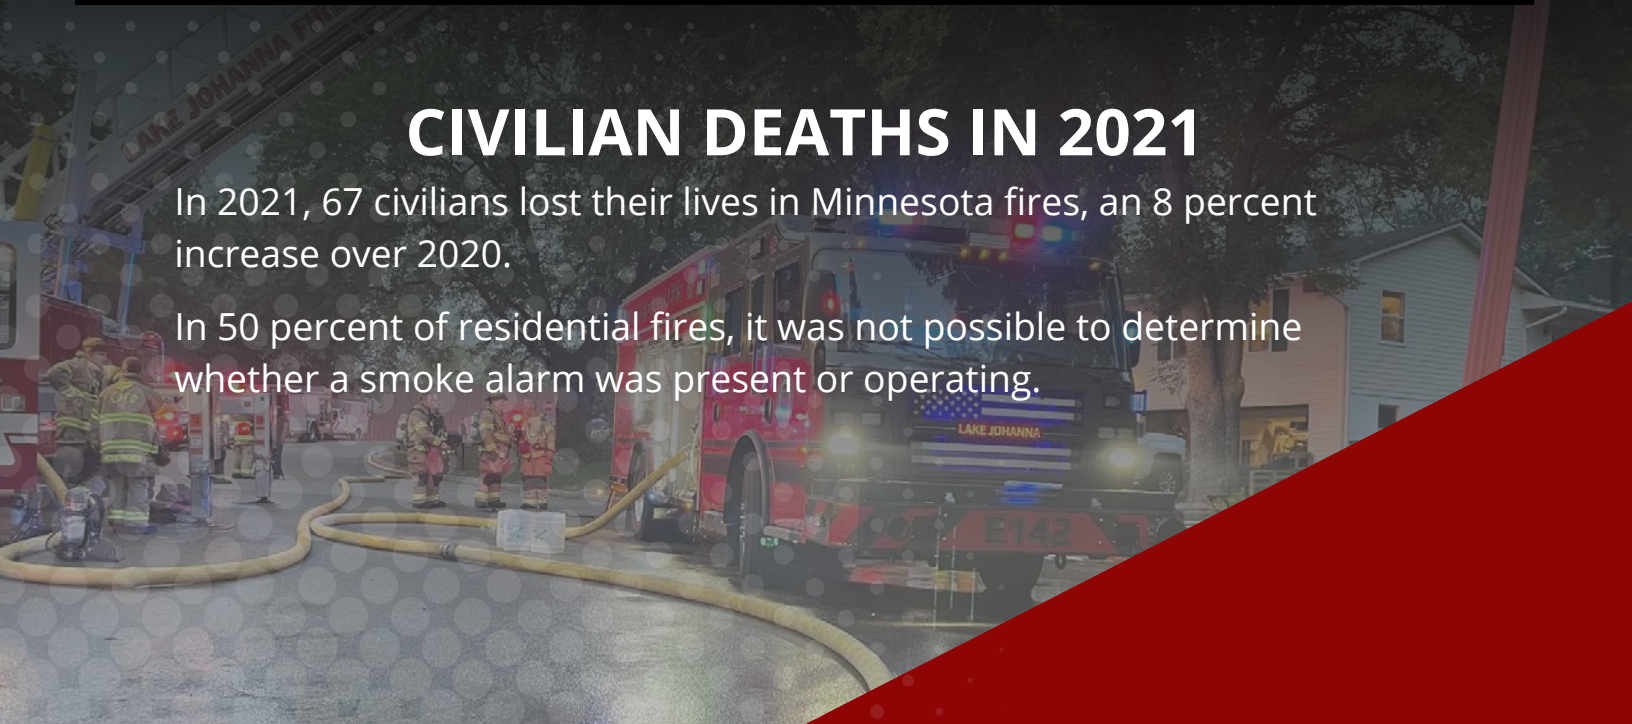

# 30+ YEARS OF MINNESOTA FIRE DEATHS

## CIVILIAN DEATHS IN 2021

In 2021, 67 civilians lost their lives in Minnesota fires, an 8 percent increase over 2020.

In 50 percent of residential fires, it was not possible to determine whether a smoke alarm was present or operating.

# 30-PLUS YEARS OF FIRE DEATH HISTORY

As Minnesota's population has grown from 3.8 million in 1970 to over 5.7 million in 2021, fire deaths have generally decreased. During the 1980s, fire deaths in Minnesota dropped 19 percent from the levels of the 1970s. The 1990's showed a further decrease of 25 percent from the levels of the 1980s. The 2000's had a decrease of 21 percent from the 1990s.

Much of this decline in the fire death trend can be attributed to fire service advancements. Since the mid '70s, the promotion of fire protection technology (smoke alarms, sprinkler systems, etc.) has become widespread in Minnesota.

The state has also mandated new inspection and code enforcement programs targeting hotels, motels, schools, and health and day care facilities.

# CIVILIAN FIRE DEATHS SINCE 1990

# FIRE DEATHS AND SMOKE ALARM PERFORMANCE

Circumstance	Fatalities	% of Dwelling Fires	% of Total Deaths
No Smoke Alarms Present	5	13%	7%
Smoke Alarms Present	11	29%	16%
Unknown if smoke alarms Present/Operable	19	50%	28%
Not a factor/Suicides, Explosions, etc.	3	8%	4%
Total Deaths in Dwellings	38	100%	57%
Other Fire Deaths (Including vehicles, outdoors, other structures, etc.)	29	N/A	43%
<b>Total Fire Deaths</b>	<b>67</b>	<b>N/A</b>	<b>100%</b>

Of the 11 fire fatalities where smoke alarms were present, only five were reported as having alerted the occupants. The factors contributing to the fatalities include:

- Being trapped above fire.
- Re-entered the building.
- Clothing caught fire (not while escaping).
- Injury.

It is unknown why one individual did not get out.

# Civilian Fire Deaths

The number of people killed in fires in 2021 who were ages 40 and over increased in 2021.

## 2021 CIVILIAN FIRE DEATHS BY AGE

## 2021 CIVILIAN FIRE DEATHS BY MONTH

## 2021 CIVILIAN FIRE DEATHS BY DAY OF THE WEEK

## CIVILIAN FIRE DEATHS WHERE AND WHY?

Fifty-six percent of all 2021 fire deaths occurred where people generally feel safest – in their homes.

1-2 Family Dwelling  
29 Fatalities

Vehicle  
15 Fatalities

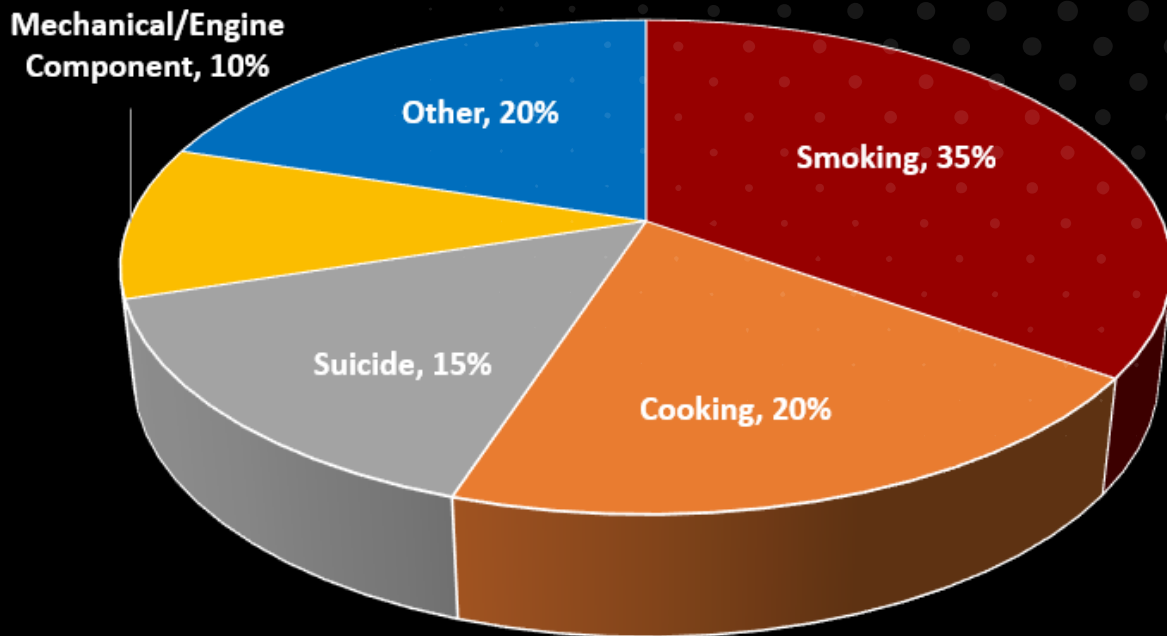

Outdoors  
15 Fatalities

Multi-Family Dwelling  
9 Fatalities

In 2021, careless smoking was the leading cause of known fatal fires. Alcohol or drug use was a factor in 43 percent of careless smoking deaths and in 42 percent of all fire deaths.

## 2021 KNOWN CAUSES OF CIVILIAN FIRE DEATHS

# 2021 Fire Deaths (list)

Date	City	Structure Type	Cause	Age
1/1/2021	Maple Lake	1 or 2 family dwelling	Undetermined	62
1/7/2021	Minneapolis	1 or 2 family dwelling	Undetermined	50

In the past 32 years there have been 1,647 fire deaths in Minnesota. (See distribution by county on the next page.) According to the 2020 US census data, approximately 45 percent of our state population lived in greater Minnesota, where the per capita fire death rate was 1.69 deaths per 100,000 people. The per capita fire death rate for the metro area in 2021 was .76 deaths per 100,000, while the rate for the state as a whole was 1.17 per 100,000 people. That is above the national average per capita fire death rate, which was 1.15 per 100,000 in 2020. There are three Minnesota counties that have remained fatality free for the past 32 years: Traverse, Stevens and Murray.

# FIREFIGHTER DEATHS

There were two line of duty fire deaths in Minnesota in 2021. (Source: Minnesota Fire Service Foundation). We honor those who have fallen and remember them with pride and gratitude for their dedicated service in protecting their fellow citizens.

# FIREFIGHTER INJURIES

In 2021, there were 339 firefighter injuries reported – an increase of 13 percent from 2020. Of these injuries, 135 (40 percent) were fire-related. Sixty-eight percent of these fire-related injuries occurred while firefighters were fighting residential structure fires (93). Of known causes, “Exposure to Hazard” was the most common (33.4 percent) with overexertion as the next highest at 25.6 percent.

## 2021 FIREFIGHTER INJURIES BY CAUSE

# FIREWORKS INJURIES AND PROPERTY LOSS

SFMD has gathered information about fireworks injuries and property damage since 1989. Minnesota hospitals voluntarily report injuries treated in their emergency departments during the period from June 25 through July 15 each year.

Property damage information is taken from the Minnesota Fire Incident Reporting System. From 1989 through 2001, \$1.6 million in property damage resulting from fireworks use was reported, averaging more than \$123,000 annually. The total property damage due to fireworks use from 2002 through 2004 was over \$3 million. In 2021 alone, fireworks were responsible for over \$2.7 million in losses.

Property damage reported over the last 10 years totaled more than \$6.5 million.

## FIREWORKS INCIDENT DOLLAR LOSS

	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
June-July	\$194,746	\$64,000	\$161,510	\$61,969	\$310,898	\$720,575	\$261,800	\$190,351	\$1,017,788	\$2,768,687
No. of Incidents	47	27	28	25	52	54	36	41	85	240
% of Total Dollar Loss	97%	68%	9%	73%	99%	>99%	52%	49%	47%	99%
Average Dollar Loss	\$4,144	\$2,370	\$5,768	\$2,479	\$5,979	\$13,344	\$7,272	\$4,643	\$11,974	\$14,345
Total/Year	\$200,446	\$94,300	\$1,748,610	\$84,469	\$311,510	\$721,275	\$503,450	\$385,401	\$2,164,376	\$2,772,686

Average Dollar Loss	\$2,537	\$2,050	\$47,260	\$2,011	\$4,581	\$10,159	\$8,990	\$6,761	\$19,676	\$13,079

- 2014 totals includes \$1.3 million vehicle storage fire in Zumbrota.
- 2020 totals include two high-dollar building fires of \$400,000 and \$380,000.
- 2021 totals include three high-dollar building fires of more than \$400,000.

Fireworks injuries most commonly occur to males between 20 and 29 years old, with burns being the most common type of reported injury. Burn injuries include those to the extremities, eyes and face. It is impossible to know how many people were injured and did not seek medical attention.

## FIREWORKS INJURIES BY AGE

Age	2020		2021		Total	
	#	%	#	%	#	%
0-9	12	15%	7	41%	127	19%

<b>Male</b>	<b>54</b>	<b>70%</b>	<b>16</b>	<b>94%</b>	<b>460</b>	<b>70%</b>
<b>Female</b>	<b>23</b>	<b>30%</b>	<b>1</b>	<b>6%</b>	<b>192</b>	<b>29%</b>

Fireworks injury reporting was down substantially in 2021. This may have been the result of a change in the reporting process as we transition from paper to electronic submissions.

There was one injury that listed age as "unknown" or "0" in 2011, one injury in 2015, one injury in 2016, one injury in 2017, two injuries in 2018, one injury in 2019, and one in 2020.

There was one fire death from fireworks in 2015, and another in 2021. There were four additional fireworks injuries in 2021 occurring outside the June 22-July 15 timeframe.

# Summary

Historically, Minnesotans have been at greatest risk of fire death and injury in their own homes. In 2021, 57 percent of fire deaths and 67 percent of civilian injuries occurred in residential settings. Ninety-seven percent of fire deaths in structures were in residential property. The presence or absence of working smoke alarms is often a factor in fire fatalities. In 63 percent of fire deaths occurring in dwellings, smoke alarms, were reported as either “not present” or unable to determine if the alarms were working at the time of the fire.

Careless smoking was the leading cause of fire deaths in 2021 with seven fire deaths. Alcohol or drug use was an impairing factor in 31 percent of all fire deaths.

Overall, fire deaths have decreased over the past 30 years in Minnesota, even as the population has grown. However, many preventable tragedies continue to occur. Prevention and education efforts, particularly those targeting vulnerable populations, are essential to reduce losses from fire.

# PARTICIPATION

---

# Minnesota Fire Incident Reporting System

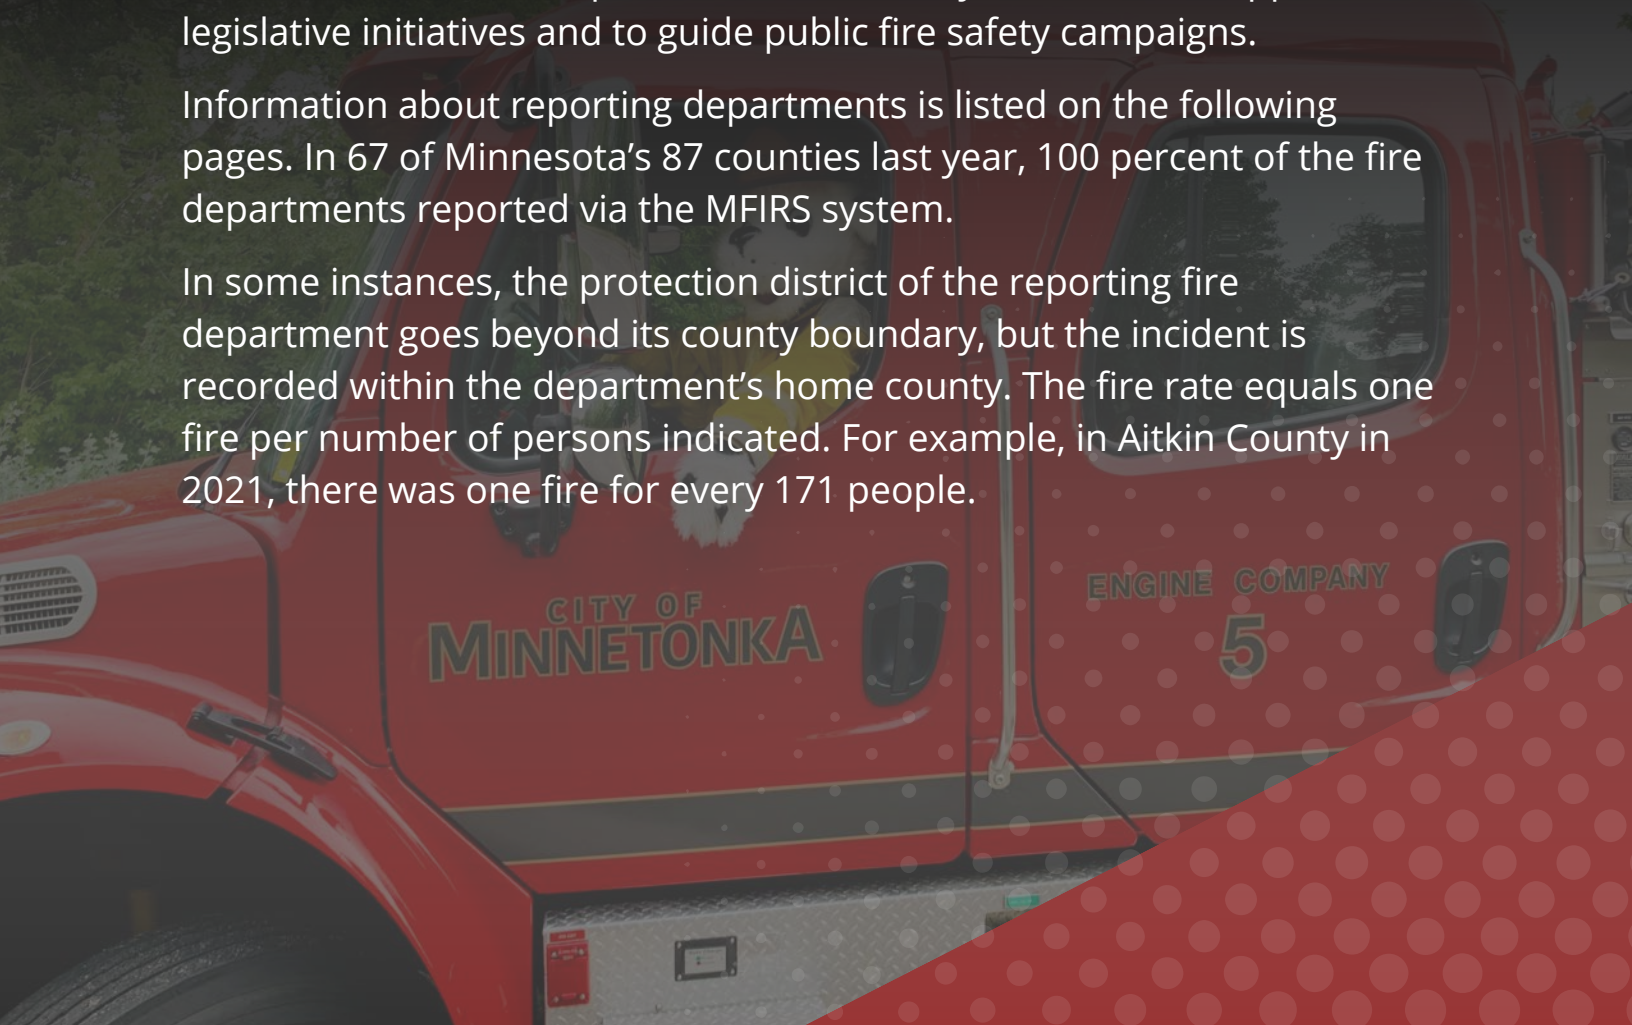

The Minnesota State Fire Marshal Division appreciates the efforts of the fire departments that submitted data via the Minnesota Fire Incident Reporting System (MFIRS) in 2021.

This information is essential if we are to understand and effectively combat the fire problem in Minnesota. At the local level, this data provides information to help focus prevention efforts on challenging areas; it also assists with budget planning for staffing and equipment.

Fire data is requested on a weekly basis by the media, the public, the fire service and the fire protection community. It is used to support legislative initiatives and to guide public fire safety campaigns.

Information about reporting departments is listed on the following pages. In 67 of Minnesota's 87 counties last year, 100 percent of the fire departments reported via the MFIRS system.

In some instances, the protection district of the reporting fire department goes beyond its county boundary, but the incident is recorded within the department's home county. The fire rate equals one fire per number of persons indicated. For example, in Aitkin County in 2021, there was one fire for every 171 people.
